Collisions Of Fast Charged Particles In Solids:

Collisions of Fast Charged Particles in Solids Nikolai Pavlovich Kalashnikov, Valeri Stefanovich Remizovich, Mikhail Ivanovich Rižanov, 1985 *The Observation of Atomic Collisions in Crystalline Solids* R. S. Nelson, 2013-10-22

The Observation of Atomic Collisions in Crystalline Solids presents a critical account of the more important experiments which have provided the basis for a better understanding of atomic collision phenomena in crystalline solids Collisions have been divided into two artificial regimes primary collisions which deal with the interaction of the incident particles with the solid and secondary collisions which deal with those events which occur as a result of lattice atoms recoiling from primary encounters Although the book is intended principally for the experimentalist some simple theoretical models have been introduced It is hoped that the book will provide a useful introduction to the subject of atomic collisions in solids for the post graduate research student as well as providing a collection of the most important experimental data for established scientists actively engaged in the field It is also intended to provide a background for the technologist engaged in such fields as the ion implantation doping of semiconductors

Interaction of Charged Particles with Solids and Surfaces Alberto Gras-Martí, Herbert M. Urbassek, Nestor R. Arista, Fernando Flores, 2012-12-06

Early in 1989 while most of us were gathered in the Mediterranean five centuries old city of Alacant the idea of a school on stopping and particle penetration phenomena came to our minds Later that year when discussing this plan with some of the participants in the 13th International Conference on Atomic Collisions in Solids in Aarhus we were pleased to note that the proposal was warmly welcomed indeed by the community An Advanced Study Institute on this or a related subject had not been organized in the last decade Because of the progress made particularly in the interaction of high energy beams with matter and the many applications which the general subject of the stopping of charged particles ions and electrons in matter enjoys a Study Institute appeared a worthy enterprise Even though several international conference series cover developments in these areas they miss tutorial introductions to the field The title chosen was Interaction of Charged Particles with Solids and Surfaces and the objectives were stated as follows to cover theory and experiments including selected applications and hot topics of the stopping of charged particles ions and electrons in matter The emphasis will be on outlining the areas where further effort is needed and on specifying the basic needs in applications Fundamental concepts will prevail over applications and the character of the Institute as a school will be stressed The school was directed by Fernando Flores Spain Herbert M Urbassek Germany Nestor R
