**My Colombian War** Silvana Paternostro,2013-11-05 A timely evocative account of a reporter s reckoning with her homeland s volatile past Growing up in the coastal city of Barranquilla Colombia Silvana Paternostro indulged in the typical concerns of a privileged young girl friendships and parties school and family But soon it became apparent that life in Colombia would not go on as usual Strange planes appeared overhead the harbingers of the marijuana drug trade that would explode into cocaine wars over the next decade and soon after a disputed election would lead to demonstrations and kidnappings targeting the affluent landed elite including Paternostro s family A revolution was brewing and the social inequalities reflected in her life would boil over into the most violent most protracted and most misunderstood civil war of our time In **My Colombian War** Paternostro journeys back to the place where her family and her closest friends still live weaving authentic experience into a history of this ongoing conflict Through interviews she allows us to witness the treacherous war zone that Colombia has become projected on the daily lives of its citizens Paternostro s book is a stunning comprehensive narrative of Colombia s past and present

In recent years immigration and the integration of migrants and minorities have become politicised in public and policy debates in Britain the rest of Europe and the United States In such debates migrants are commonly treated as objects of politics and spoken in terms of management national interest control and contention This treatment has characterised not only policy makers and politicians but also many academics Existing scholarly research on migrants as subjects of politics is

limited and largely carried out through detached and structural approaches These approaches have focused on the institutional environments in which mobilisations develop They have however overlooked migrants conditions experiences subjectivities and practices as well as the focus of their engagement This volume contributes to the study of migrants mobilisation through theoretically informed original empirical papers focusing on current forms and aspects of migrants and minorities practices of citizenship in an engaged and people centred manner In particular the book addresses issues of change both in the forms assumed by migrants and minorities political engagements and in the transformations these engagements produce as well as exclusion inclusion dynamics that migrants experience with regard to the political process and more generally This book was previously published as a special issue of Ethnic and Racial Studies
