Barbara Allan, 1988     Subject Guide to Books in Print, 1997     **Forthcoming Books** Rose Army, 2002     *Bounding Biomedicine* Colleen Derkatch, 2016-04-21

During the 1990s unprecedented numbers of Americans turned to complementary and alternative medicine CAM an umbrella term encompassing health practices such as chiropractic energy healing herbal medicine homeopathy meditation naturopathy and traditional Chinese medicine By 1997 nearly half the US population was seeking CAM in one form or another spending at least 27 billion out of pocket annually on related products and services As CAM rose in popularity over the decade so did mainstream medicine's interest in understanding whether those practices actually worked and how Medical researchers devoted considerable effort to testing CAM interventions in clinical trials and medical educators scrambled to assist physicians in advising patients about CAM In *Bounding Biomedicine* Colleen Derkatch examines how the rhetorical discourse around the published research on this issue allowed the medical profession to maintain its position of privilege and prestige throughout this process even as its place at the top of the healthcare hierarchy appeared to be weakening Her research focuses on the ground breaking and somewhat controversial CAM themed issues of *The Journal of the American Medical Association* and its nine specialized Archives journals from 1998 demonstrating how these texts performed rhetorical boundary work for the medical profession As Derkatch reveals the question of how to test healthcare practices that don't fit easily or at all within mainstream Western medical frameworks sweeps us into the realm of medical knowledge making the research teams clinical trials and medical journals that determine which treatments are safe and effective and also out into the world where doctors meet patients illnesses find treatment and values practices policies and priorities intersect Through *Bounding Biomedicine* Derkatch shows exactly how narratives of medicine's entanglements with competing models of healthcare shape not only the historical episodes they narrate but also the very fabric of medical knowledge itself and how the medical profession is made and remade through its own discursive activity
