Aalto Malcolm Quantrill, 1990-02-01 Alvar Aalto was remarkably inventive in architecture and industrial design. Moreover, his command of technology was integrated with a humanistic style of building and like Saarinen and Frank Lloyd Wright he sought an organic synthesis of his structures with their surroundings. Aalto's success in approaching these ideals may account for the extraordinary spread of his influence on an international scale. In this broad study of Aalto's work, Malcolm Quantrill assesses its development in terms of two powerful sources: the Finnish National Romantic movement and the Modern movement in architecture. His critique of Aalto's most significant buildings and furniture designs is complemented by photographs of many stages of their creation, from the spontaneity of initial sketches to the completed detail. Professor Quantrill first met Alvar and Elissa Aalto at Muuratsalo in June 1953 and he has been studying and photographing Aalto's buildings ever since. His book provides striking insights into the work of one of the greatest architects of the century.

Alvar Aalto, Designer and Architect Coppa & Avery Consultants, 1980 **Alvar Aalto als Designer** Alvar Aalto, Werner Blaser, 1982 **Alvar Aalto** Göran Schildt, Alvar Aalto, 1994 **Sketches** Alvar Aalto, 1978 This nearly complete collection of Aalto's literary sketches and lectures from 1922 to 1968 expresses the architect's views on modernism, traditionalism, and functionalism; the design of housing and furnishings; city and regional planning; and technology and the quality of life. These short pieces are enriched by drawings from Aalto's travels in the Mediterranean countries and North Africa.

Alvar Aalto Houses Jari Jetsonen, Alvar Aalto, Markku Lahti, 2005 During the course of a career spanning over 50 years, Alvar Aalto designed nearly 100 single-family houses. Many of them are architectural gems where his thoughts about dwelling and architecture come together. Aalto considered experimental building to be very important; in his opinion, there should always be an opportunity for experimentation in every project, for it is only in that way that architecture can be promoted and quality improved for the good of the little man. It was specifically in the designing of single-family houses that Aalto could realize new ideas. Aalto's single-family houses can be divided into three groups: houses for individuals, the client of which was nearly always a relative or friend; houses designed for industrial institutions or other communities; and type or standard houses. All the houses presented in *Alvar Aalto Houses* were originally designed for private clients. The book presents eight single-family houses by Aalto from the 1920s to the end of the 1960s, built in Finland, Estonia, and France. Book jacket.
