

Earth-Moon system as seen from spacecraft. Colours in its image to the outer planets

## PLANETARY SATELLITES

Human made object placed in orbit around Earth or another celestial body.

Body of natural origin in orbit around a planet.

1. Atmosphere - none
2. Core - probably molten rock or iron
3. Moon phases - Moon goes through a series of phases every 29.5 days (synodic period).
4. Rotation: Moon's rotational period matches its orbital period. This results in the Moon always having the same side facing Earth.
5. Tides: Caused by gravitational effects of the Moon and Sun. The Moon's closer proximity causes it to have about twice the gravitational effect of the Sun.
  - a. Spring tides: High tides that occur because the Moon and Sun are positioned in line with Earth so their gravitational fields reinforce each other.
  - b. Neap tides: Low tides that occur because the Moon and Sun are positioned at right angles to each other.
6. Moon data
  - a. Mass:  $7.36 \times 10^{22}$  kg
  - b. Average density:  $3.34 \text{ g/cm}^3$
  - c. Equatorial diameter: 3,476 km
  - d. Equatorial surface gravity:  $1.67 \text{ m/s}^2$
  - e. Equatorial escape speed:  $2.4 \text{ km/s}$
  - f. Average surface temperature:  $-274 \text{ to } 200^\circ\text{K}$
  - g. Average distance from Earth: 384,400 km
  - h. Orbital period (sidereal month): 27.32 days
  - i. Orbital period (synodic month): 29.53 days
  - j. Geometric albedo: 0.12
  - k. Apparent magnitude:  $-12.7$  (full phase)

## ASTEROIDS, METEORIDS, COMETS, AND INTERPLANETARY MEDIUM

asteroids, meteoroids, and comets are debris left over from the birth of the solar system.

1. Asteroids: solid rocky bodies also called planetoids and are remnants of the solar nebula.
2. Asteroid belt: Remnants of asteroids that orbit the Sun between Mars and Jupiter. Their orbital periods range from three to six years.
3. Meteoroids: any small celestial object moving through space having the potential of becoming a meteor or meteorite.

4. Meteor: a meteoroid that has entered the Earth's atmosphere. Due to friction with the Earth's atmosphere, the meteor heats up and glows.
5. Meteorite: a meteorite is a meteoroid that has reached the surface of the Earth.
  - a. Iron meteorite
  - b. Stone (chondritic) meteorite
  - c. Stony (sideritic) meteorite
6. Comets are icy orbital body existing in the solar system.
  - a. Head: consists of the nucleus and coma
    - 1) nucleus: mixture of dust and frozen gas that consists primarily of frozen water, carbon dioxide, ammonia, and methane
    - 2) coma: diffuse envelope of gas that surrounds the nucleus due to evaporation of the nucleus from the sun.
  - b. Tail: long streams of gas and dust from the head.
  - c. Periodic comets: comets with a closed elliptical orbit within the solar system. (e.g. Halley's comet).
  - d. Non-periodic: comets passing through the solar system with open orbits.
7. Interplanetary medium: This is the dust, electrically charged particles and neutral gas found between the planets.

Fragments of comet Shoemaker/Levy 9 impacting Jupiter's surface, June 1994

## ECLIPSES

when light from a celestial body is partially or completely blocked by the presence of another.

1. Solar eclipse: when the Moon lies between the Sun and the Earth, thereby blocking the Sun's light.
2. Total solar eclipse: when the Moon's disk completely covers the Sun's.
3. Partial solar eclipse: when the Moon's disk partially covers the Sun's.
4. Annular eclipse: occurs when the Moon is further from Earth. The Moon's diameter appears smaller than the Sun's and fails to completely cover it. This results in a ring of sunlight surrounding the Moon.
5. Lunar eclipse: occurs when the Moon enters the Earth's shadow.
6. Total lunar eclipse: when the Moon lies entirely within the Earth's umbra (dark central part of its shadow).
7. Partial lunar eclipse: when the Moon lies partially in the umbra and penumbra (the lighter outer part of the Earth's shadow).

8. Penumbral eclipse: when the Moon lies entirely within the Earth's penumbra. The Moon's disk is only slightly darkened.

Orion Nebula: a birthplace of stars. This nebula is a glowing mass of ionized hydrogen gas. High-speed jets of hot gas ejected from newly ignited stars rip through the nebula, spawning new stars.

## STARS

a enormous ball of hot ionized gas (plasma). Stars generate energy through thermonuclear fusion, building heavier elements from lighter ones (nucleosynthesis).

1. Distant stars are born from huge interstellar clouds of dust called nebulae.
2. On the equator, stars rise above the horizon earlier each successive night and appear to revolve because of atmospheric turbulence.

a pair of stars in orbit around each other and bound together by their mutual gravitational attraction.

1. Optical double: a pair of stars that lie in the same line of sight as seen from Earth. These stars are not physically associated with each other and are therefore not a true binary.
2. Visual binary: a visual binary is a star in which the two components can be resolved as separate images with an appropriate star telescope.
3. Spectroscopic binary: a spectroscopic binary is a pair of stars that are separated by observing lines of two different spectral types.
4. Eclipsing binary: a star system in which the orbital motion of the two stars causes them to pass in front of each other and reduce their light, as seen from Earth.
5. Apparent binary: a star in which the presence of an unseen companion is revealed by specific irregularities in the position of the brighter star.
6. Spectroscopic binary: a spectroscopic binary is a system in which the two stars are so close together that their presence must be revealed by spectroscopic analysis.

a group of three or more stars orbiting around each other and bound together by their mutual gravitational attraction.

1. star whose light output varies regularly or irregularly.
  - a. Novae: a binary star system that suddenly increases its brightness by as much as 10,000 times and then slowly decreases. This is caused by a white dwarf absorbing material

### **Astronomy Ii Exam Notes Introduction**

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for specific titles or browse through different categories. Another reliable platform for downloading Astronomy Ii Exam Notes free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge. Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows researchers and scholars to share their work with a global audience. Users can download PDF files of research papers, theses, and dissertations covering a wide range of subjects. Academia.edu also provides a platform for discussions and networking within the academic community. When it comes to downloading Astronomy Ii Exam Notes free PDF files of magazines, brochures, and catalogs, Issuu is a popular choice. This digital publishing platform hosts a vast collection of publications from around the world. Users can search for specific titles or explore various categories and genres. Issuu offers a seamless reading experience with its user-friendly interface and allows users to download PDF files for offline reading. Apart from dedicated platforms, search engines also play a crucial role in finding free PDF files. Google, for instance, has an advanced search

feature that allows users to filter results by file type. By specifying the file type as "PDF," users can find websites that offer free PDF downloads on a specific topic. While downloading Astronomy Ii Exam Notes free PDF files is convenient, its important to note that copyright laws must be respected. Always ensure that the PDF files you download are legally available for free. Many authors and publishers voluntarily provide free PDF versions of their work, but its essential to be cautious and verify the authenticity of the source before downloading Astronomy Ii Exam Notes. In conclusion, the internet offers numerous platforms and websites that allow users to download free PDF files legally. Whether its classic literature, research papers, or magazines, there is something for everyone. The platforms mentioned in this article, such as Project Gutenberg, Open Library, Academia.edu, and Issuu, provide access to a vast collection of PDF files. However, users should always be cautious and verify the legality of the source before downloading Astronomy Ii Exam Notes any PDF files. With these platforms, the world of PDF downloads is just a click away.

### FAQs About Astronomy Ii Exam Notes Books

1. Where can I buy Astronomy Ii Exam Notes books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Astronomy Ii Exam Notes book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Astronomy Ii Exam Notes books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets:

You can create your own spreadsheet to track books read, ratings, and other details.
