At Issue Politics In The World Arena:

At Issue Steven L. Spiegel, David J. Pervin, 1994 This popular reader for the International Relations survey course includes 33 contributions by leading scholars and political leaders *Regional Orders* David A. Lake, Patrick M. Morgan, 2010-11 Conflict among nations for forty five years after World War II was dominated by the major bipolar struggle between the United States and the Soviet Union With the end of the Cold War states in differing legions of the world are taking their affairs more into their own hands and working out new arrangements for security that best suit their needs This trend toward new regional orders is the subject of this book which seeks both to document the emergence and strengthening of these new regional arrangements and to show how international relations theory needs to be modified to take adequate account of their salience in the world today Rather than treat international politics as everywhere the same or each region as unique this book adopts a comparative approach It recognizes that while regions vary widely in their characteristics comparative analysis requires a common typology and set of causal variables It presents theories of regional order that both generalize about regions and predict different patterns of conflict and cooperation from their individual traits The editors conclude that in the new world of regional orders the quest for universal principles of foreign policy by great powers like the United States is chimerical and dangerous Regional orders differ and policy must accommodate these differences if it is to succeed Contributors are Brian L.
