Tondeur,2001-06-21 Kuo Tsai Chen 1923 1987 is best known to the mathematics community for his work on iterated integrals and power series connections in conjunction with his research on the cohomology of loop spaces His work is intimately related to the theory of minimal models as developed by Dennis Sullivan whose own work was in part inspired by the research of Chen An outstanding and original mathematician Chen s work falls naturally into three periods his early work on group theory and links in the three sphere his subsequent work on formal differential equations which gradually developed into his most powerful and important work and his work on iterated integrals and homotopy theory which occupied him for the last twenty years of his life The goal of Chen s iterated integrals program which is a de Rham theory for path spaces was to study the interaction of topology and analysis through path integration The present volume is a comprehensive collection of Chen s mathematical publications preceded by an article The Life and Work of Kuo Tsai Chen placing his work and research interests into their proper context and demonstrating the power and scope of his influence

Hyperbolic Partial Differential Equations Matthew Witten,2014-05-23 *Hyperbolic Partial Differential Equations III* is a refereed journal issue that explores the applications theory and or applied methods related to hyperbolic partial differential equations or problems arising out of hyperbolic partial differential equations in any area of research This journal issue is interested in all types of articles in terms of review mini monograph standard study or short communication Some studies presented in this journal include discretization of ideal fluid dynamics in the Eulerian representation a Riemann problem in gas dynamics with bifurcation periodic McKendrick equations for age structured population growth and logistic models of structured population growth A number of book reviews are also included This journal provides an interdisciplinary forum for the presentation of results not included in other particular journals and thus will be beneficial to those interested in this field of study **The Topology of Stiefel Manifolds** I. M. James,1976 Stiefel manifolds are an interesting family of spaces much studied by algebraic topologists These notes which originated in a course given at Harvard University describe the state of knowledge of the subject as well as the outstanding problems The emphasis throughout is on applications within the subject rather than on theory However such theory as is required is summarized and references to the literature are given thus

making the book accessible to non specialists and particularly graduate students Many examples are given and further problems suggested
