Bucharest In Your Pocket , *Tallinn In Your Pocket* , **Popular Photography** ,1912 Products, Users, and Popular Luxury in Early Modern Greece Artemis Yagou,2024-08-05 This book analyses aspects of the material culture of early modern Greece from an object based perspective using surviving artefacts from that period as primary sources A printed book a wine jug an ecclesiastical embroidery and a pocket watch are used as entry points to examine the consumer practices of the emerging Greek bourgeoisie under Ottoman rule in the long eighteenth century The acquisition and usage of novel products especially imported ones by Greeks was connected to personal expression identity building and self determination in the context of the Enlightenment The enjoyment of innovative artefacts opened new horizons to them and facilitated their individual and collective empowerment The originality of the book lies in its eclectic and interdisciplinary approach towards early modern Greek material culture an under researched topic The study is embedded within contemporary discourses on transnational trade the materiality of everyday life pleasurable consumption and the negotiation of identities This volume will appeal to students and scholars of early modern and modern Greek history Ottoman history European history material culture history of technology museum studies and cultural heritage studies as well as museum professionals collectors and the wider educated public *The Photographic News* ,1894 **Birdscapes** Jeremy Mynott,2009 What draws us to the beauty of a peacock the flight of an eagle or the song of a nightingale Why are birds so significant in our lives and our sense of the world And what do our ways of thinking about and experiencing birds tell us about ourselves Birdscapes is a unique meditation on the variety of human responses to birds from antiquity to today and from casual observers to the globe trotting twitchers who sometimes risk life limb and marriages simply to add new species to their life lists Drawing extensively on literature history philosophy and science Jeremy Mynott puts his own experiences as a birdwatcher in a rich cultural context His sources range from the familiar Thoreau Keats Darwin and Audubon to the unexpected Benjamin Franklin Giacomo Puccini Oscar Wilde and Monty Python Just as unusual are the extensive illustrations which explore our perceptions and representations of birds through images such as national emblems women s hats professional sports logos and a Christmas biscuit tin as well as classics of bird art Each chapter takes up a new theme from rarity beauty and sound to conservation naming and symbolism and is set in a new place as Mynott travels from his home patch in Suffolk England to his away patch in New York City s Central Park as well as to Russia Australia and Greece Conversational playful and witty Birdscapes gently leads us to reflect on large questions about our relation to birds and the natural world It encourages birders to see their pursuits in a broader human context and it shows nonbirders what they may be missing *Popular Photography* ,1960 Bulletin of Photography ,1914 **Camera Graeca: Photographs, Narratives, Materialities** Philip Carabott,Yannis Hamilakis,Eleni Papargyriou,2016-03-09 While written sources on the history of Greece have been studied extensively no systematic attempt has been made to examine photography as an important cultural and material process This is surprising

given that Modern Greece and photography are almost peers both are cultural products of the 1830s and both actively converse with modernity *Camera Graeca Photographs Narratives Materialities* fills this lacuna It is the first inter disciplinary volume to examine critically and in a theorised manner the entanglement of Greece with photography The book argues that photographs and the photographic process as a whole have been instrumental in the reproduction of national imagination in the consolidation of the nation building process and in the generation and dissemination of state propaganda At the same time it is argued that the photographic field constitutes a site of memory and counter memory where various social actors intervene actively and stake their discursive material and practical claims As such the volume will be of relevance to scholars and photographers worldwide The book is divided into four tightly integrated parts The first *Imagining Greece* shows that the consolidation of Greek national identity constituted a material cum representational process the projection of an imagery although some photographic production sits uneasily within the national canon and may even undermine it The second part *Photographic narratives alternative histories* demonstrates the narrative function of photographs in diary keeping and in photobooks It also examines the constitution of spectatorship through the combination of text and image and the role of photography as a process of materializing counter hegemonic discourses and practices The third part *Photographic matter realities* foregrounds the role of photography in materializing state propaganda national memory and war The final part *Photographic ethnographies*
