Atlas of Endocrine Organs Akira Matsumoto, Susumu Ishii, 1987 *Atlas of Endocrine Organs* Akira Matsumoto, Susumu Ishii, 1992

Vertebrate Endocrinology David O. Norris, James A. Carr, 2020-10-10 Vertebrate Endocrinology Sixth Edition provides a comprehensive up to date treatment of the endocrine system for college and university students as well as researchers This book is logically arranged easily comprehended and well illustrated It covers traditional hormone based systems and introduces all forms of chemical communication their implications for the health of humans domesticated and wild vertebrates Written by two experts who have completed extensive research in comparative vertebrate endocrinology with an emphasis on natural and anthropogenic environmental factors influencing endocrine systems Collectively the authors have taught courses in endocrinology at the undergraduate and graduate level for more than 60 years After first publishing in 1985 Vertebrate Endocrinology Sixth Edition continues to serve as an important resource for graduate students and advanced undergraduates in the biological sciences animal sciences and veterinary sciences Endocrine researchers will also benefit from the book s relevance in the areas of comparative veterinary and mammalian endocrinology Addresses the endocrinology of all vertebrate and non vertebrate chordates The only endocrinology textbook that deals with evolutionary aspects of endocrine systems Includes biochemical cellular tissue organismic behavioral and environmental aspects of chemical communication

Invertebrate Tissue Culture Methods Jun Mitsuhashi, 2012-12-06 I started insect cell culture work in 1962 when T D C Grace reported the first establishment of invertebrate continuous cell lines He obtained growing cells from pupal ovaries of the emperor gum moth *Antheraea euca lypti* At that time I was trying to obtain growing cells from leafhoppers Grace s method could not be applied directly to my culture because of the differences in species the size of the insects and the tissue to be cul tured The vertebrate tissue culture methods gave me some ideas for pre paring cultures from leafhoppers but those could not be used directly either There were no textbooks and no manuals for invertebrate tissue culture so I had to develop a method by myself First I considered what type and what size of vessels are suitable for insect tissue culture Also I had to look for suitable materials to construct the culture vessels Sec ond I had to examine various culture media especially growth promot ing substances such as sera Then I had to improve culture media by trial and error The procedure to set up a primary culture was also a problem How could I sterilize materials How could I remove tissues from a tiny insect How many tissues should I pool in order to set up one culture I had to find out the answers Naturally it took a lot of time
