PROJECT GBA C *Dreaming Souls* Owen Flanagan,2001-05-17 What if anything do dreams tell us about ourselves What is the relationship between types of sleep and types of dreams Does dreaming serve any purpose Or are dreams simply meaningless mental noise unmusical fingers wandering over the piano keys With expertise in philosophy psychology and neuroscience Owen Flanagan is uniquely qualified to answer these questions And in *Dreaming Souls* he provides both an accessible survey of the latest research on sleep and dreams and a compelling new theory about the nature and function of dreaming Flanagan argues that while sleep has a clear biological function and adaptive value dreams are merely side effects free riders irrelevant from an evolutionary point of view But dreams are hardly unimportant Indeed Flanagan argues that dreams are self expressive the result of our need to find or to create meaning even when we re sleeping Rejecting Freud s theory of manifest and latent content of repressed wishes appearing in disguised form Flanagan shows how brainstem activity during sleep generates a jumbled profusion of memories images thoughts emotions and desires which the cerebral cortex then attempts to shape into a more or less coherent story Such dream narratives range from the relatively mundane worries of non REM sleep to the fantastic confabulations of deep REM that resemble psychotic episodes in their strangeness But however bizarre these narratives may be they can shed light on our mental life our well being and our sense of self
