## Asymptotic Methods In Queuing Theory:

Asymptotic Methods in Queuing Theory Aleksandr Alekseevich Borovkov, 1984 Queueing Systems, Networks and Telecommunication Systems Vyacheslav M. Abramov, 2009 This book is concerned with the study of non Markovian queueing systems and networks with applications to telecommunication systems Its main contribution consists in deriving results for non Markovian systems We study large closed client server communication networks and losses in single server queueing systems with an application to communication networks of loss queues The main result of this study are i an explicit expression for the interrelation between the limiting non stationary distributions in non bottleneck client stations ii derivation of diffusion and fluid approximations for the non Markovian queue length in the bottleneck client station For the loss networks considered we find an asymptotic expression for the loss probability and other performance measures as buffer capacity increases to infinity We also find the changes in the loss probability when redundant packets are added to the messages Back cover
