Nicaragua as of 1993** Thomas R. Howell,2010-10-10 Between December 1951 and April 1967 Thomas R Howell made 13
separate research trips to Nicaragua The result was a collection of over 2 000 bird skins and at least 16 publications that
form the backbone of Nicaraguan ornithology In the late 1970s Howell began working on a manuscript that was intended to
be his major contribution to the ornithology of the country The first version of this Check list of the Birds of Nicaragua was
not ready until 1983 and many different typewritten versions circulated among a small but growing number of Nicaraguan
biologists for the next two decades Partly because of Howell s passion for detail and completeness and finally because of his
failing health in the late 1990s the check list was never published before his death in December 2004 This monograph
remedies what had become a significant obstacle to further studies in the country by providing in Howell s own words a
comprehensive background for subsequent explorations It documents the 654 species 611 supported with specimen evidence
known to have occurred in Nicaragua as of 1993 the date of the last substantial revision of the manuscript and also provides
a rationale for anticipating another 44 species The publication of this significant chapter in the history of Central American
bird studies is offered both as a tribute to Tom Howell s enthusiasm and contributions and as a frame of reference and
springboard for current and future ornithologists inspired to study the rich and still largely unexplored avifauna of Nicaragua
