Is there hope for man That terrible question was posed by Robert L Heilbroner in the original version of *An Inquiry into the Human Prospect* In this third edition of a book that has become a classic Professor Heilbroner leaves the question in place on the first page believing some twenty years later that that interrogative sounds the themes of the 1990s as well The main components of the global predicament he described in the first edition are still with us today runaway populations obliterative weaponry and a closing environmental vise Writing now in the aftermath of the extraordinary events that caused communism as a challenger to capitalism to vanish like a puff of smoke Professor Heilbroner traces out the difficulties that beset those attempting centrally planned economics He shows how Soviet style systems became mired in bureaucratic swamps But he warns that the triumph of profit driven market directed economies will not delay the looming encounter with the ecological barrier The absorption capacities of the environment writes Professor Heilbroner whether in terms of the greenhouse effect or the overrunning of other physico chemical capabilities of the planet still determine the limits of the economic expansion Trenchant and unflinching Professor Heilbroner s look at the sum and substance of our prospects for the remaining years of this century is provocative and indispensable reading for those who prefer not to avert their gaze from the hard realities of our times

In the papers collected here, writers from five continents consider whether the Bible indicates any method for ministry among the poor, the place of the poor in God's plan, God's purpose, and the movement of human history; the nature of the gospel of the kingdom; and the interrelation of the gospel and human culture. In addition to the individual papers, the book includes the statement *Transformation*, which was produced by the consultation as a whole.
