

A top-down view of various natural health ingredients arranged on a light-colored wooden surface. In the top left, a white bowl contains fresh green herbs. To its right is a sliced orange. Below the bowl is a whole white garlic bulb. In the bottom left is a piece of ginger root. In the bottom center is a small glass jar of honey with a wooden honey dipper. To the right of the honey is a small wooden spoon filled with several light-colored, oval-shaped pills, with a few more pills scattered nearby. Fresh green herbs are also scattered around the honey jar. The text "NATURAL HEALTH" is centered in the middle of the image in a bold, dark green font.

An Introduction to the Geography of Health Helen Hazen, Peter Anthamatten, 2019-11-26 In the second edition of *An Introduction to the Geography of Health* Helen Hazen and Peter Anthamatten explore the ways in which geographic ideas and approaches can inform our understanding of health. The book's focus on a broad range of physical and social factors that drive health in places and spaces offers students and scholars an important holistic perspective on the study of health in the modern era. In this edition the authors have restructured the book to emphasize the theoretical significance of ecological and social approaches to health. Spatial methods are now reinforced throughout the book and other qualitative and quantitative methods are discussed in greater depth. Data and examples are used extensively to illustrate key points and have been updated throughout including several new extended case studies such as water contamination in Flint Michigan, microplastics pollution, West Africa's Ebola crisis and the Zika epidemic. The book contains more than one hundred figures including new and updated maps, data graphics and photos. The book is designed to be used as the core text for a health geography course for undergraduate and lower level graduate students and is relevant to students of biology, medicine, entomology, social science, urban planning and public health.
