The Province of All Mankind Stephen Buono,2025-07-15 The Province of All Mankind is the story of a powerful idea about the cosmos Born in the science fiction literature of the nineteenth century and maturing in the Age of Apollo this idea held that outer space should be preserved as a sanctuary from human strife free from weapons warfare and political rivalry If humanity could somehow leave violence behind as it moved into space perhaps peace would finally reign Bucking a half century of space race scholarship Stephen Buono argues that despite waging a totalizing Cold War the United States achieved stunning diplomatic successes that heralded the cosmos as a realm of peace and cooperation The early story of space politics is not primarily one of militarization but rather of political prescience and restraint The Province of All Mankind demonstrates that space became a unique domain of American foreign relations and international law and provides lessons for the Second Cold War unfolding over the horizon

Utopia Duncan Bell,Douglas Mao,2026-02-06 Ideal societies better worlds more just and peaceful ways of living these have long been the stuff of social dreaming In this compact volume two leading scholars from different disciplines join to consider the life of utopian imagining within the frame of literature and politics Duncan Bell a political scientist and intellectual historian opens the book with a critical overview of the Anglophone utopian tradition and a fresh definition of utopia He then shows how the threat of technological annihilation and the promise of transcendence of human limitations has shaped utopian and dystopian writing of the last hundred years Douglas Mao a scholar of literature begins the second part of the book by delving into utopian literature s vexed relation to sentimental feeling especially as this is signalled by speculation on how inhabitants of utopia themselves would read literary works He then shows how utopian writing s orientation to problem solving puts it into surprising relation with both politics and literature in general An interview in which the two authors compare their methods and conclusions closes out the book

The Legacy of Olaf Stapledon Patrick Mccarthy,Charles Elkins,Martin Greenberg,1989-01-10 Although better known

today for such classic and influential science fiction novels as *Last and First Men*, *Odd John*, *Star Maker* and *Sirius*. Olaf Stapledon also wrote eight other science fiction books, seven volumes of philosophy and social criticism, and hundreds of reviews, lectures, and articles. Common to all his works is a moral vision that is characterized by ecstatic joy and revolutionary zeal, though tempered by detachment and skepticism. This is the first book collection of original essays devoted entirely to Stapledon. Where previous critical interpretation has concentrated on individual works by the author, these essays deal with larger issues in Stapledon's writings and with his relationship to such forces as Marxism and literary modernism. The articles develop new avenues for the exploration of Stapledon's work, focusing on philosophical, linguistic, political, and structural elements, and showing how Stapledon's non-fictional writing may illuminate aspects of the fiction. In addition, the book includes Stapledon's hitherto unpublished manuscript *Letters to the Future*, as well as a primary and secondary bibliography. An important contribution to the study of science fiction and fantasy, *The Legacy of Olaf Stapledon* will be of interest to scholars and students of Stapledon and of the genre. Olaf Stapledon John Kinnaird, 1986 **Memory, Imagination and Desire in Contemporary Anglo-American Literature and Film** Constanza del Río Álvaro, Luis M. García Mainar, 2004 This volume offers a series of analyses on the renewed interest of western culture in themes and aesthetic proposals that either look back to the past or recreate future worlds. The turn of the century has witnessed artistic efforts to reconsider past literary and cinematographic forms and adapt them to the new social concerns of contemporary artists and readers/viewers. Similarly, science fiction and utopian narratives have attempted to reshape the world as we know it and speculate about the mysteries the future might hold for us. This book includes contributions that focus on and problematise the dialogue between past, present, and future in literary works and films produced within the English-speaking context in the last two decades of the 20th century. It is divided in five sections: maps of the postmodern, the postcolonial experience, stories revisited, popular narrative genres, and views of the future, which attempt to include all the motifs associated with that dialogue, from the interaction of memory and history to the reformulation of old stories and forms, or the representation of dystopian and utopian futures.
