**Outline of Occult Science** Rudolf Steiner,1972-01-01 *An Outline of Occult Science* Rudolf Steiner,1922 An Outline of Occult Science is Rudolf Steiner's thesis discussing the unknown the nature of mankind and his belief that science may be used to explain the unusual phenomena known as the occult First published in 1910 this book strives to define categorize and explain various manifestations of the occult The author concedes at the opening of the book that many otherwise open minded and receptive individuals immediately recoil from the concept of the the unknown especially in relation to attempts to investigate it scientifically After introducing the occult Steiner delves into explaining the two worlds he thought comprised the reality we live in The natural world that which is visible and readily perceivable around us and the spiritual world where the unexplained phenomena arise The nature of man as a bodily being and how his physical self bridges the gap between these two worlds is much detailed Famous as a literary critic Rudolf Steiner's interest in the occult phenomena meant that much of his later life was characterized by research into spiritual texts He passionately believed that much of the strange paranormal or occult phenomena human beings have observed have a spiritual yet scientific explanation it is with this essential belief in mind that Steiner attempts to persuade the reader Although unusual in subject matter An Outline of Occult Science is written in an accessible style What would otherwise be dry and inscrutable is made interesting and exotic by Steiner who was used to writing for a popular audience in his career as a literary critic This edition of his book contains all of his original notes which are appended at the conclusion for ease of reference [An Outline of Occult Science](#) Rudolf Steiner,1914 **An Outline of Occult Science** Rudolf Steiner,2019-02-27 One who undertakes to represent certain results of scientific spiritual research of the kind recorded in this book must above all things be prepared to find that this kind of investigation is at the present time almost universally regarded as impossible For things are related in the following pages about which those who are today esteemed exact thinkers assert that they will probably remain altogether indeterminable by human intelligence One who knows and can respect the reasons which prompt many a serious person to assert this impossibility would fain make the attempt again and again to show what misunderstandings are really at the bottom of the belief that it is not given to human knowledge to penetrate into the superphysical worlds For two things present themselves for consideration First no human being will on deeper reflection be able in the long run to shut his eyes to the fact that his most important questions as to the meaning and significance of life must remain unanswered if there be no access to higher worlds Theoretically we may delude ourselves concerning this fact and so get away from it the depths of our soul life however will not tolerate such self delusion The person who will not listen to what comes from these depths of the soul will naturally reject any account of supersensible worlds There are however people and their number is not small who find it impossible to remain deaf to the demands coming from the depths of the soul They must always be knocking at the gates which in the opinion of others bar the way to what is incomprehensible *Occult Science* Rudolf Steiner,2011-06 Written in

[An Outline of Esoteric Science](#) Rudolf Steiner,1997 As vital and relevant as when it was first published in 1910 this masterpiece of esoteric Rosicrucian cosmology on which Rudolf Steiner worked and then reworked for many years making it ever more precise and accurate remains the most effective presentation to date of the spiritual alternative to contemporary materialist cosmologies and the Darwinian view of human nature and evolution In this basic work of spiritual science readers learn how the creation and evolution of humanity is embedded at the heart of the vast invisible web of interacting cosmic beings through whom the alchemical processes of cosmic evolution unfold There are also descriptions of the different bodies of the human being and their relation to sleep and death as well as a detailed practical guide to the methods or exercises including the Rose Cross Meditation by which such initiation knowledge can be attained Most remarkable and revolutionary of all perhaps is the central function that Rudolf Steiner allots to the Christ and to the entrance of Christ into early evolution through the Mystery of Golgotha back cover

**Beyond Our Own, and the Evolution of Man's Spiritual Science (Hardcover)** Rudolf Steiner, 2018-06-25 An Outline of Occult Science is Rudolf Steiner's thesis discussing the unknown nature of mankind and his belief that science may be used to explain the unusual phenomena known as the occult. First published in 1910, this book strives to define, categorize, and explain various manifestations of the occult. The author concedes at the opening of the book that many otherwise open-minded and receptive individuals immediately recoil from the concept of the unknown, especially in relation to attempts to investigate it scientifically. After introducing the occult, Steiner delves into explaining the two worlds he thought comprised the reality we live in: the natural world that is visible and readily perceivable around us, and the spiritual world where the unexplained phenomena arise. The nature of man as a bodily being and how his physical self bridges the gap between these two worlds is much detailed.

At the present time the words occult science are apt to arouse the most varied feelings. Upon some people they work like a magic charm, like the announcement of something to which they feel attracted by the innermost powers of their soul; to others there is in the words something repellent, calling forth contempt, derision, or a compassionate smile. By many occult science is looked upon as a lofty goal of human effort, the crown of all other knowledge and cognition; others who are devoting themselves with the greatest earnestness and noble love of truth to that which appears to them true science, deem occult science mere idle dreaming and fantasy, in the same category with what is called superstition. To some occult science is like a light without which life would be valueless; to others it represents a spiritual danger, calculated to lead astray immature minds and weak souls. While between these two extremes is to be found every possible intermediate shade of opinion, strange feelings are awakened in one who has attained a certain impartiality of judgment in regard to occult science: its adherents and its opponents. When one sees how people undoubtedly possessed of a genuine feeling for freedom in many matters become intolerant when they meet with this particular line of thought, and an unprejudiced observer will scarcely fail in this case to admit that what attracts many adherents of occult science or occultism is nothing but the fatal craving for what is unknown and mysterious, or even vague. And he will also be ready to own that there is much cogency in the reasons put forward against what is fantastic and visionary by serious opponents of the cause in question. In fact, one who studies occult science will do well not to lose sight of the fact that the impulse toward the mysterious leads many people on a vain chase after worthless and dangerous will-o-the-wisps. Even though the occult scientist keeps a watchful eye on all errors and vagaries on the part of adherents of his views, and on all justifiable antagonism, yet there are reasons which hold him back from the immediate defence of his own efforts and aspirations. These reasons will become apparent to any one entering more deeply into occult science. It would therefore be superfluous to discuss them here. If they were cited before the threshold of this science had been crossed, they would not suffice to convince one who held back by irresistible repugnance, refuses to cross that threshold. But to one who effects an entry, the reasons will soon manifest themselves with unmistakable clearness.

from within This much however implies that the reasons in question point to a certain attitude as the only right one for an occult scientist He avoids as much as he possibly can any kind of outer defence or conflict and lets the cause speak for itself He simply puts forward occult science and in what it has to say about various matters he shows how his knowledge is related to other departments of life and science what antagonism it may encounter and in what way reality stands witness to the truth of his cognitions He knows that an attempted vindication would not merely on account of current defective thinking but by virtue of a certain inner necessity lead into the domain of artful persuasion and he desires nothing else than to let occult science work its own way quite independently The first point in occult science is by no means the advancing of assertions or opinions which are to be proven but the communication in a purely narrative form of experiences which are to be met with in a world other than the one that is to be seen with physical eyes and touched with physical hands And further it is an important point that through this science the methods are described by which man may verify for himself the truth of such communications
