Analysis And Improvement Of Plant Cold Hardiness:

ANALYSIS & IMPROVEMENT OF PLANT COLD HARDINESS Charles R. Olien, Myrtle N. Smith, 1981-09-11 Advances in Plant Cold Hardiness Paul H. Li, 2018-01-10 Advances in Plant Cold Hardiness provides a detailed up to date discussion of plant cold hardiness research The molecular mechanisms of plant cold hardiness development a subject not covered in any other low temperature stress book is examined in depth Other major topics addressed include the freezing tolerance and injury of plant tissues in vivo and in vitro in addition to how research findings impact agricultural applications The articles featured in Advances in Plant Cold Hardiness were presented as key papers at the 4th International Plant Cold Hardiness Seminar held at the Swedish University of Agricultural Sciences in Uppsala in July 1991 The book will appeal to all researchers students and instructors in plant biology agriculture and forestry Plant Cold Hardiness Paul H. Li, Tony H.H. Chen, 2013-11-11 This volume is compiled based on the proceedings of the 5th International Plant Cold Hardiness Seminar which was held at Oregon State University Corvallis Oregon USA August 5 to 8 1996 Participants representing 16 nations and 22 U S states attended the seminar Researchers came from major laboratories around the world involving plant cold hardiness research The information compiled in this volume represents the state of the art research and our understanding of plant cold hardiness in terms of molecular biology biochemistry and physiology The 1996 International Plant Cold Hardiness Seminar was the fifth of the series it was first held in 1977 at the University of Minnesota St Paul MN and since then has met every 5 years The overall goal of this seminar series is to foster the exchange of ideas and research findings among the diverse groups of scientists studying freezing and chilling stresses from a wide variety of perspectives This is the only international conference focusing its programs entirely on low temperature stress in plants In accordance with the tradition the fifth conference focused on freezing and chilling stress of plants and covered various aspects of plant cold hardiness including molecular genetics biochemistry physiology and agricultural applications All contributors to this volume are eminent researchers who have had significant contributions to the knowledge of plant cold hardiness **Low-Temperature Stress in Plants: Molecular Responses, Tolerance Mechanisms, Plant Biodesign and Breeding Applications** Jin Xu, Tangchun Zheng, Douglas S. Domingues, Yang Liu, Ping Li, Sagheer Ahmad, 2024-05-17 Low temperature stress is the primary abiotic stress that affects the growth and development of plants and their geographical distribution This can lead to the solidification of membrane lipids and decrease of enzymatic reaction rate in plants in a relatively short time or indirectly affect the imbalance of respiration and photosynthesis accumulation of toxic substances ATP depletion cell solute leakage and wilting due to water loss Low temperature stress can be divided into chilling stress and freezing stress according to the damage caused to plants Both chilling and freezing stress drastically threaten global food security and species diversity in the northern and frigid temperate zones Once plants experience low temperature stress the regulation mechanism of gene expression is rapidly activated to cope with the adverse environment **Proceedings of the International Symposium**

Gusta, Karen K. Tanino, Michael E.
