Worlds of Work Daniel B. Cornfield, Randy Hodson, 2002-01-31 The advent of transnational economic production and market integration compels sociologists of work to look beyond traditional national boundaries and build an international sociology of work in order to effectively address the human scientific and practical challenges posed by global economic transnationalism The purpose of this volume is to promote transnational dialogue about the sociology of work and help build a truly international discipline in this field

Running the Numbers: A Practical Guide to Regional Economic and Social Analysis: 2014 John Quintero, 2014-12-18 Through use of practical examples and a plainspoken narrative style that minimises the use of maths this book demystifies data concepts sources and methods for public service professionals interested in understanding economic and social issues at the regional level By blending elements of a general interest book a textbook and a reference book it equips civic leaders public administrators urban planners nonprofit executives philanthropists journalists and graduate students in various public affairs disciplines to wield social and economic data for the benefit of their communities While numerous books about quantitative research exist few focus specifically on the public sector Running the Numbers in contrast explores a wide array of topics of regional importance including economic output demographics business structure labour markets and income among many others To that end the book stresses practical applications minimises the use of maths and employs extended chapter length examples that demonstrate how analytical tools can illuminate the social and economic workings of actual American regions

Analyzing the Labor Force Clifford C. Clogg, Scott R. Eliason, Kevin T. Leicht, 2001-12-31 With the passing of Clifford Collier Clogg at the age of 45 on May 7th 1995 the world lost a talented sociologist demographer and statistician all at once In addition to being a considerable talent in each of these three disciplines and perhaps more importantly Cliff was the type of person who brought to gether diverse elements and scholars from all three Cliff was also a consummate mentor nurturing ideas and students and always striving to bring out the best in both Perhaps nothing illustrates the stature impact and respect others held for Cliff more than the fact that never before and never since has an individual been honored at the time of his death with ceremonies from the national associations of all three of these disciplines The purpose of this book is to introduce to a broad constituency of social scientists and their students some of the basic ideas in the study of the labor force that Cliff and his colleagues had grappled with At the time of Cliff's death he was perhaps better known for his methodological contributions to sociology and demography than he was for his substantive contributions to the study of social stratification and the labor force Our goal is to highlight Cliff's substantive contributions to sociology and demography by telling the cumulative story of his research and adding updated analysis that

advances the story beyond the early 1980s to the mid 1990s *The Economy and Labour Markets* Ross McKittrick, Queen's University (Kingston, Ont.).
