An Introduction To Theoretical Geomorphology:

An Introduction to Theoretical Geomorphology Colin E. Thorn, 1988 An Introduction to Theoretical Geomorphology C. Thorn, 2014-01-14 This book stems from the belief that undergraduate and many graduate students in geomorphology are taught far too little about the theoretical foundation of the discipline This is a tragic oversight because all disciplines exist solely by virtue of a body of theory furthermore all substantive research must of necessity be directed at improving this body of theory While the centrality of theory is a characteristic of all science it appears that it is fieldwork that has achieved sacrosanct status in geomorphology The supreme standing of fieldwork would seem at first sight to be supported by such comments as that cited by Ager 1984 p 42 My old professor the great H H Read once said The best geologist is other things being equal he who has seen the most rocks The key issue in Read s comment is obviously other things being equal what are these other things For they will be just as applicable to geomorphology as to geology at large One is certainly personal ability but another critical component is the individual s knowledge of relevant theory Pursuit of theoretical knowledge is not generally a favored activity in geomorphology a situation epitomized by Chorley s 1978 p 1 one liner Whenever anyone mentions theory to a geomorphologist he instinctively reaches for his soil auger *An Introduction to Theoretical Geomorphology* C. comprised of a short definition a summary of the principal arguments a substantive 5 000 word discussion the use of real life examples and annotated notes for further reading The teaching of research methods is integral in all geography courses Key Methods in Geography identifies the key analytical and observational strategies with which all geography undergraduates should be conversant Science, Philosophy and Physical Geography Robert Inkpen,2005 Robert Inkpen explores the relationship between philosophy science physical geography to address an imbalance that exists in opinion teaching to a lesser extent research between a philosophically enriched human geography a philosophically ignorant physical geography

Theoretical Geomorphology Adrian E. Scheidegger,2013-04-17 The surface features of the Earth are commonly split into two categories the first of which comprises those features that are due to processes occurring inside the solid Earth endogenetic features and the second those that are due to processes occurring outside the solid Earth exogenetic features Specifically the endogenetic features are treated in the science of geodynamics the exogenetic features in the science of geomorphology I have treated the theoretical aspects of the endogenetic features in my Principles of Geodynamics and it is my aim to supplement my earlier book with a discussion of the theory of the exogenetic features It is my hope that the two books will together present a reasonably coherent if necessarily incomplete account of theoretical geology Contrary to endogenetic phenomena exogenetic processes can often be directly observed as they occur the action of a river the development of a slope and the evolution of a shore platform are all sufficiently rapid so that they can be seen as they take place This has the result that in geomorphology one is generally on much less speculative ground regarding the mechanics of the processes at work than one is in geodynamics *Bibliography and Index of Geology* ,1991 **Physical Geography** K J Gregory,2005-10-10 This four volume set begins by examining the knowledge of physical geography from the quantitative revolution to current state of mathematical models The principal environment spheres for example the biosphere are

examined to show the greater concern with environmental dynamics now central to the discipline This work includes studies of environmental change looking at short term as well as longer term change and evaluating aspects of global change Volume IV focuses on the total physical environment examining human activity and human impact environmental hazards and applied physical geography **Geomorphology of New Zealand** Charles Andrew Cotton,1922 *University of California Union Catalog of Monographs Cataloged by the Nine Campuses from 1963 Through 1967: Authors & titles* University of California (System).
