Analysis of the Phenomena of the Human Mind James Mill, 1878 **The Analysis of Mind** Bertrand Russell, 1956

Analysis of the Phenomena of the Human Mind James Mill, 2014-08-29 An excerpt from the introductory to Volume II SOME NAMES WHICH REQUIRE A PARTICULAR EXPLANATION We have now seen that in what we call the mental world Consciousness there are three grand classes of phenomena the most familiar of all the facts with which we are acquainted SENSATIONS IDEAS and the TRAIN OF IDEAS We have examined a number of the more complicated cases of Consciousness and have found that they all resolve themselves into the three simple elements thus enumerated We also found it necessary to shew for what ends and in what manner marks were contrived of sensations and ideas and by what combinations they were made to represent expeditiously trains of those states of consciousness Some marks or names however could not be explained till some of the more complicated states of consciousness were unfolded these also are names so important and so peculiar in their mode of signification that a very complete understanding of them is required It is to the consideration of these remarkable cases of Naming that we now proceed Under the modest title of an explanation of the meaning of several names this chapter presents us with a series of discussions of some of the deepest and most intricate questions in all metaphysics Like Plato the author introduces his analysis of the most obscure among the complex general conceptions of the human mind in the form of an enquiry into the meaning of their names The title of the chapter gives a very inadequate notion of the difficulty and importance of the speculations contained in it and which make it perhaps the profoundest chapter of the book It is almost as if a treatise on chemistry were described as an explanation of the names air water potass sulphuric acid and the results of analysis are not far apart In James Mill s chapter on Consciousness

Mr Russell may find very nearly his own analysis of consciousness at least his analysis of mind and in Mill s chapter on Belief he may find an analysis which might almost be his own analysis of consciousness In both chapters he will find Mill fighting with him to establish his major contention that there is nothing in consciousness or in mind but a relation of content And his major thesis that physics and psychology are not distinguished by their material is precisely Mill s For what after all are the neutral entities of neo realism but Mill s phenomena in other terms Altogether it would be very interesting to be told what analysis has accomplished in ninety two years Equally striking however in Russell and Mill is the resemblance in style One notes the same assumption of logical rigor the same indifference to hostile opinion the same artificial clearness and the same finality of statement But there is also a difference James Mill s analysis was a savage attempt to convince one wonders whether Mr Russell expects to do more than perplex *The Philosophical Review* Volume 31 1922
