Analysis of Speedup in Distributed Algorithms John P. Fishburn, 1984 **Analysis of Speedup in Distributed Algorithms** John P. Fishburn, 1981 Scientific and Technical Aerospace Reports, 1982 Data Management and Analysis Reda Alhadj, Mohammad Moshirpour, Behrouz Far, 2019-12-20 Data management and analysis is one of the fastest growing and most challenging areas of research and development in both academia and industry Numerous types of applications and services have been studied and re examined in this field resulting in this edited volume which includes chapters on effective approaches for dealing with the inherent complexity within data management and analysis This edited volume contains practical case studies and will appeal to students researchers and professionals working in data management and analysis in the business education healthcare and bioinformatics areas The Design and Analysis of Parallel Algorithms Selim G. Akl, 1989 Mathematics of Computing Parallelism **Design and Analysis of Parallel Algorithms for Game-tree Search** Igor Robert Steinberg, 1991 **Algorithm Design for Networked Information Technology Systems** Sumit Ghosh, 2007-05-08 I felt deeply honored when Professor Sumit Ghosh asked me to write the foreword to his book with an extraordinary perspective I have long admired him first as a student leader at Stanford where he initiated the first IEEE Computer Society's student chapter and later as an esteemed and inspiring friend whose transdisciplinary research broadened and enhanced the horizons of practitioners of computer science and engineering including my own His ideas which are derived from his profound vision deep critical thinking and personal intuition reach from information technology to bioscience as exhibited in this excellent book To me an ordinary engineer it opens up a panoramic view of the Universe of Knowledge that keeps expanding and spiraling like the good Indian proverb which says a good book informs you an excellent book teaches you and a great book changes you I sincerely believe that Professor Ghosh's book will help us change and advance the methods of systems engineering and technology Vision Inspired vision sees ahead of others what will or may come to be a vivid imagined concept or anticipation An inspired vision personifies what is good and what like minded individuals hope for Our vision is one of creating an Internet of minds where minds are Web sites or knowledge centers which create store and radiate knowledge through interaction with other minds connected by a universal shared network This vision will not just hasten the death of distance but will also incarcerate ignorance **Towards a New Evolutionary Computation** Jose A. Lozano, 2006-01-12 Estimation of Distribution Algorithms EDAs are a set of algorithms in the Evolutionary Computation EC field characterized by the use of explicit probability distributions in optimization Contrarily to other EC techniques such as the broadly known Genetic Algorithms GAs in EDAs the crossover and mutation operators are substituted by the sampling of a distribution previously learnt from the selected individuals EDAs have experienced a high development that has transformed them into an established discipline within the EC field This book attracts the interest of new researchers in the EC field as well as in other optimization disciplines and that it becomes a reference for all of us working on this topic The

twelve chapters of this book can be divided into those that endeavor to set a sound theoretical basis for EDAs those that broaden the methodology of EDAs and finally those that have an applied objective

Analysis of a New Search Algorithm for Two-player Games Lloyd Tony Lim,1993

Parallel Sorting Algorithms Selim G. Akl,1985 Parallel sorting algorithms is an overview over sorting algorithms for various parallel computer architectures After introducing the problem of sorting giving a taxonomy of parallel computer architectures and discussing efficiency concepts in parallel algorithms various sorting methods on SIMD and MIMD computers are introduced The author describes and analyzes sorting algorithms on sorting networks vector machines the perfect shuffle mesh and cube connected computers tree machines and asynchronous MIMD machines Furthermore there are chapters on parallel external sorting and general lower bounds for the problem of parallel sorting The book is very readable and serves as an excellent means to get an overview over methods to solve the important problem of parallel sorting
