Analytical And Negotiating Issues In The Global Trading System:

Analytical and Negotiating Issues in the Global Trading System Alan V. Deardorff, Robert Mitchell Stern, 1994
Addresses the main issues and problems of the global trading system **Symbolic Power in the World Trade**

Organization Matthew Eagleton-Pierce, 2013 Questions of power are central to understanding global trade politics and no account of the World Trade Organization WTO can afford to avoid at least an acknowledgment of the concept A closer examination of power can help us to explain why the structures and rules of international commerce take their existing forms how the actions of countries are either enabled or disabled and what distributional outcomes are achieved However within conventional accounts there has been a tendency to either view power according to a single reading namely the direct coercive sense or to overlook the concept entirely focusing instead on liberal cooperation and legalization In this book Matthew Eagleton Pierce shows that each of these approaches betray certain limitations which in turn have cut short or worked against more critical appraisals of power in transnational capitalism To expand the intellectual space the book investigates the complex relationship between power and legitimation by drawing upon Pierre Bourdieu's notion of symbolic power A focus on symbolic power aims to alert scholars to how the construction of certain knowledge claims are fundamental to and entwined within the material struggle for international trade Empirically the argument uncovers and plots the recent strategies adopted by Southern countries in their pursuit of a more equitable trading order By bringing together insights from political economy sociology and law **Symbolic Power in the WTO** not only enlivens and enriches the study of diplomatic practice within a major multilateral institution it also advances the broader understanding of power in world politics

Global Development Fifty Years after Bretton Woods Albert Berry, Roy Culpeper, Frances Stewart, 2016-07-27 The international economic order created at Bretton Woods in 1944 was not crafted with the developing countries principally in mind Moreover the nature of the world community has changed profoundly in the last half century The problems and opportunities of developing countries have moved to centre stage in today's global economy The 16 contributors to this volume examine ways in which the international economic system could be reformed in order better to meet the needs and aspirations of the developing world in the coming decades **The Global Trading System: Exceptions to the core rules**
