Analyzing Strategic Nuclear Policy:

Analyzing Strategic Nuclear Policy Charles L. Glaser, 2014-07-14 With sweeping changes in the Soviet Union and East Europe having shaken core assumptions of U S defense policy it is time to reassess basic questions of American nuclear strategy and force requirements In a comprehensive analysis of these issues Charles Glaser argues that even before the recent easing of tension with the Soviet Union the United States should have revised its nuclear strategy rejecting deterrent threats that require the ability to destroy Soviet nuclear forces and forgoing entirely efforts to limit damage if all out nuclear war occurs Changes in the Soviet Union suggests Glaser may be best viewed as creating an opportunity to make revisions that are more than twenty years overdue Glaser s provocative work is organized in three parts The Questions behind the Questions evaluates the basic factual and theoretical disputes that underlie disagreements about U S nuclear weapons policy Alternative Nuclear Worlds compares mutual assured destruction capabilities MAD a world in which both superpowers societies are highly vulnerable to nuclear retaliation to the basic alternatives mutual perfect defenses U S superiority and nuclear disarmament Would any basic alternatives be preferable to MAD Drawing on the earlier sections of the book Decisions in MAD addresses key choices facing American decision makers Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Logic of American Nuclear Strategy Matthew Kroenig, 2018-01-25 For decades the reigning scholarly wisdom about nuclear weapons policy has been that the United States only needs the ability to absorb an enemy nuclear attack and still be able to respond with a devastating counterattack So long as the US or any other nation retains such an assured retaliation capability no sane leader would intentionally launch a nuclear attack against it and nuclear deterrence will hold According to this theory possessing more weapons than necessary for a second strike capability is illogical This argument is reasonable but when compared to the empirical record it raises an important puzzle Empirically we see that the United States has always maintained a nuclear posture that is much more robust than a mere second strike capability In *The Logic of American Nuclear Strategy* Matthew Kroenig challenges the conventional wisdom and explains why a robust nuclear posture above and beyond a mere second strike capability contributes to a state s national security goals In fact when a state has a robust nuclear weapons force such a capability reduces its expected costs in a war provides it with bargaining leverage and ultimately enhances nuclear deterrence This book provides a novel theoretical explanation for why military nuclear advantages translate into geopolitical advantages In so doing it helps resolve one of the most intractable puzzles in international security studies Buoyed by an innovative thesis and a vast array of historical and quantitative

evidence The Logic of American Nuclear Strategy will force scholars to reconsider their basic assumptions about the logic of nuclear deterrence

Great Power Security Cooperation David W. Kearn, 2014-12-18 This book explains the conditions under which great powers are likely to cooperate to improve their security by engaging in qualitative arms control In agreeing to limit or proscribe certain classes of weapons states will constrain their military capabilities and therefore decrease the threat they pose to potential adversaries Focusing on the expected military impact of technological change and the capacity of states to confidently monitor the activities of its negotiating partners it may be possible to forge lasting agreements that improves the security of the participating states However at other times the nature technological change may force states to engage in competitive behavior precluding cooperation and increasing the probability of conflict Examining a diverse set of cases including the Washington Naval Conference The World Disarmament Conference at Geneva the Baruch Plan for the International Control of Atomic Energy and the SALT I Accords including the ABM Treaty this volume presents a persuasive comprehensive and interesting contribution to the literature on arms racing and arms control and should be of interest to students of international relations theory and security studies By presenting a theoretical informed model that explicitly links the security strategies of states to their choices about development and deployment of new weapons and consequently their willingness to engage in arms control cooperation this book provides an important refinement upon existing theoretical and historical approaches

Russian Strategic Modernization Nikolai Sokov, 2000-01-19 This invaluable study provides a unique insider s view of the history of Soviet and Russian policy on nuclear weapons modernization and charts the future evolution of the Russian strategic arsenal Using information that has only recently become available and introducing new previously unknown data Sokov concludes that the most important force behind the evolution of the Soviet and Russian strategic arsenal was the military itself which sought to increase strategic stability by enhancing the survivability of weapons systems The highly destabilizing posture of the 1970s and 1980s was he argues in a sense accidental resulting from the failure of several R D programs and specific features of the Soviet decisionmaking mechanism The author demonstrates that the role of such factors as the economic crisis U S modernization programs and general Russian foreign policy goals has been exaggerated by Western analysts No matter how hard pressed Russia will hold to its current plans Sokov argues At the same time the military will be unlikely to engage in a new arms buildup even if the economic situation improves or a nationalist government comes to power Instead stability will be sought through better quality of weapons at progressively lower levels Introducing a wealth of new information on Soviet and Russian national security policymaking the author explores in meticulous detail such key issues as decisions on weapons development arms control negotiations and the handling of the Soviet nuclear arsenal after the breakup of the Soviet Union The reader will be able to follow the debates and intrigues between military planners diplomats and weapons designers as they clashed over the choice of acquisition programs and negotiating positions With its combination of informed analysis and

use of new documentation this work will be invaluable for all concerned with U S Russian strategic relations

Retrench, Defend, Compete Charles L. Glaser, 2025-12-15 In *Retrench Defend Compete* Charles L Glaser advances a thought provoking strategy for securing vital US interests in the face of China s rise Many believe China s ascent will drive it to war with the United States Yet this is far from inevitable geography and nuclear weapons should ensure US security The real danger Glaser contends lies in East Asia s territorial disputes especially over Taiwan To reduce the risk of war Glaser makes a bold case for ending US security commitments to Taiwan and carefully calibrating its policies on protecting South China Sea maritime features The United States should also strengthen its alliances with Japan and South Korea and eliminate unnecessarily provocative nuclear and conventional weapons policies These measures Glaser argues would defuse China s biggest security concerns while preserving America s core strategic interests Fusing theoretical insights with policy analysis *Retrench Defend Compete* lays out a distinctive and compelling approach for managing the world s most consequential geopolitical rivalry before it s too late

Rethinking Strategic Ballistic Missile Defense William J. Durch, 1993 *Rational Theory of International Politics* Charles Louis Glaser, 2010 Why do states sometimes compete and wage war while at other times they cooperate and pursue peace Does competition reflect pressures generated by the anarchic international system or rather states own expansionist goals This title offers a theory of international politics that identifies the kinds of variables that influence a state s strategy

Stepping Down the Thermonuclear Ladder Ivo H. Daalder, 1993 *The Absolute Weapon Revisited* T.V. Paul, Richard J. Harknett, James J. Wirtz, 1998-01-29 Discusses the contemporary role of nuclear weapons in international relations

Approaches to Peace Willard Scott Thompson, Kenneth Martin Jensen, United States Institute of Peace, 1991 A comprehensive one volume exploration of the peace and security field this volume presents detailed investigations of four major approaches employed in the study of conflict and peacemaking

Military Persuasion Stephen J. Cimbala, 1994 In *Military Persuasion* Stephen J Cimbala reconciles two central approaches to war and peace studies In the study of crisis management and war termination the security literature overwhelmingly emphasizes the making of credible deterrent threats and coercive bargaining while peace studies and conflict resolution literature focuses on conciliation and the offering of acceptable terms prior to or during a conflict Cimbala contends that both threats and accommodation have their place in successfully preventing and ending conflicts *Military Persuasion* is particularly welcome in the 1990s as policy makers and scholars debate whether nuclear deterrence deserves credit as a positive factor in the avoidance of military confrontation between the superpowers during the Cold War years Cimbala examines several cases of great power decision making before during and after the Cold War to demonstrate that deterrent threats alone have not successfully avoided war during this century In some important instances such as the months leading up to World War I threats have actually fed into a chain of miscalculation that ultimately led to war Cimbala also considers the Berlin crisis of 1948 the Cuban Missile Crisis of 1962 and the Gulf War of 1991 the first major post Cold War conflict *Military Persuasion*
