Atmosphere Ocean Interaction:

Atmosphere-Ocean Interaction Eric B. Kraus, Joost A. Businger, 1994-11-10 With both the growing importance of integrating studies of air sea interaction and the interest in the general problem of global warming the appearance of the second edition of this popular text is especially welcome Thoroughly updated and revised the authors have retained the accessible comprehensive expository style that distinguished the earlier edition Topics include the state of matter near the interface radiation surface wind waves turbulent transfer near the interface the planetary boundary layer atmospherically forced perturbations in the oceans and large scale forcing by sea surface buoyancy fluxes This book will be welcomed by students and professionals in meteorology physical oceanography physics and ocean engineering

Ocean-Atmosphere Interactions Y. Toba, 2010-12-04 This book presents an up to date analysis of ocean atmosphere interaction Well known experts examine diverse subjects such as ocean surface waves air sea exchange processes ocean surface mixed layer water mass formation as well as general circulation of the oceans El Nino and Southern Oscillation ENSO and the deep ocean circulation Other areas described are basic dynamics data analysis techniques numerical modelling and remote sensing This book is primarily aimed at graduate and senior undergraduate courses in the area of ocean atmosphere research

Atmosphere-ocean Interactions William Allan Perrie, 2002 The increase in levels of population and human development in coastal areas has led to a greater importance of understanding atmosphere ocean interactions This second volume on atmosphere ocean interactions aims to present several of the key mechanisms that are important for the development of marine storms

Atmosphere-ocean Interaction Eric Bradshaw Kraus, Joost Alois Businger, 2020 The second edition of this book presents an updated account of the transfer of energy matter and momentum between the atmosphere and the ocean It covers atmospheric oceanographic and climatological problems affected by air sea interactions and emphasizes an understanding of the physical processes

Ocean-Atmosphere Interactions of Gases and Particles Peter S. Liss, Martin T. Johnson, 2013-12-18 The oceans and atmosphere interact through various processes including the transfer of momentum heat gases and particles In this book leading international experts come together to provide a state of the art account of these exchanges and their role in the Earth system with particular focus on gases and particles Chapters in the book cover i the ocean atmosphere exchange of short lived trace gases ii mechanisms and models of interfacial exchange including transfer velocity parameterisations iii ocean atmosphere exchange of the greenhouse gases carbon dioxide methane and nitrous oxide iv ocean atmosphere exchange of particles and v current and future data collection and synthesis efforts The scope of the book extends to the biogeochemical responses to emitted deposited material and interactions and feedbacks in the wider Earth system context This work constitutes a highly detailed synthesis and reference of interest to higher level university students Masters PhD and researchers in ocean atmosphere interactions and related fields Earth system science marine atmospheric biogeochemistry climate Production of this book was supported and funded by the EU COST Action 735 and

coordinated by the International SOLAS Surface Ocean Lower Atmosphere Study project office **Earth's Climate** Chunzai Wang, 2004-01-09 Published by the American Geophysical Union as part of the Geophysical Monograph Series Volume 147 It is more than 30 years since the publication of Jacob Bjerknes groundbreaking ideas made clear the importance of ocean atmosphere interaction in the tropics It is now more than 20 years since the arrival of a massive El Niño in the fall of 1982 set off a cascade of observational and theoretical studies During the following decades the climate research community has made exceptional progress in refining our capacity to observe earth's climate and theorize about it including new satellite based and in situ monitoring systems and coupled ocean atmosphere predictive numerical models Of equal importance is the expanding scope of research which now reaches far beyond the Pacific El Niño and includes climate phenomena in other ocean basins In order to cover the now global context of ocean atmosphere interaction we have organized this monograph around five principal themes each introduced by one or more broad overview papers Theme I covers interaction and climate variability in the Pacific sector with extensive discussion of El Niño Southern Oscillation and with the possible causes and consequences of variability on both shorter and longer timescales Theme II is devoted to interaction in the Atlantic sector This basin exhibits complex behavior reflecting its geographic location between two major zones of convection as well as neighboring the tropical Pacific Theme III reviews the recent exciting progress in our understanding of climate variability in the Indian sector Theme IV addresses the interaction between the tropics and the extratropics which are linked through the presence of shallow meridional overturning cells in the ocean Finally Theme V discusses overarching issues of cross basin interaction

Ocean Atmosphere Interaction and Climate Modeling Boris A. Kagan, 2006-04-20 This book aims to acquaint readers with the recent advances in experimental and theoretical investigations of ocean atmosphere interactions a rapidly developing field in earth sciences Particular attention is paid to the scope and perspectives for satellite measurements and mathematical modeling Current approaches to the construction of coupled ocean atmosphere models from the simplest one dimensional to comprehensive three dimensional ones for the solution of key problems in climate theory are discussed in detail Field measurements and the results of numerical climate simulations are presented and help to explain climate variability that arises from various natural and anthropogenic factors

Climate-Ocean Interaction M.E. Schlesinger, 2012-12-06 Preface This book is the culmination of a workshop jointly organized by NATO and CEC on Climate Ocean Interaction which was held at Lady Margaret Hall Oxford University during 26-30 September 1988 The objective of the ARW was to assess the current status of research on climate ocean interaction with a major focus on the development of coupled atmosphere ocean ice models and their application in the study of past present and possible future climates This book contains 16 chapters divided into four parts Introduction Observations of the Climate of the Ocean Modelling the Atmospheric Oceanic and Sea Ice Components of the Climatic System and Simulating the Variability of Climate on Short Medium and Long Time Scales A fifth part contains the reports of the five Working Groups on Climate Observations

Modelling ENSO Modelling and Prediction Climate Ocean Interaction on Time Scales of Decades to Centuries and Impact of Paleoclimatic Proxy Data on Climate Modelling Preface ix Acknowledgements I thank Howard Cattle and Neil Wells for their guidance and assistance as members of the Workshop Organizing Committee I particularly thank Michael Davey for all his efforts as Local Organizer to make the ARW a success I also thank the staff of Lady Margaret Hall Oxford University for their help with the arrangements for the ARW
