*Atom at Spithead* David Divine,2013-09      **Atom at Spithead** David 1904-1987 Divine,2021-09-09 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public To ensure a quality reading experience this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy to read typeface We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant      **Atom at Spithead** Arthur Durham Divine,1953      Nuclear Fictions Michael Gardiner,2024-11-30 In this book Michael Gardiner suggests that the conception of the war ending weapon was tied up with a longer commitment to unified space and singular progress The mission for total weapons can be seen rising with the highly technical defensive war of the later nineteenth century and passing through twentieth century atomic research then the targeting of the outsides of commercial empire and the post war consensus with deterrence as its foundation The end of the Cold War brought an opportunity to fully naturalise deterrence but also brought a tacit acceptance of nuclear violence while forms of violence against the individual were rigorously sought out If the world unifying role of deterrence has always been undermined by the rise of rival empires it has also been questioned by critical communities including the consensus sceptics of the 1950s 60s 1980s 90s Nuclear Criticism and readers of nuclear ism millennial campaigns for Scottish independence and twenty first century descriptions of nuclear colonialism Recently it has become more obvious that an Anglosphere concept of worldly deterrence was bound to a singular and ultimately nihilistic idea of progress bio Michael Gardiner is Professor in the Department of English and Comparative Literature at the University of Warwick      *Science Fact and Science Fiction* Brian Stableford,2006-09-06 Science fiction is a literary genre based on scientific speculation Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings *Science Fact and Science Fiction* examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future As scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines Although the main focus is on literature other

forms of science fiction including film and video games are explored and because science is an international matter works from non English speaking countries are discussed as needed

**History of Atomic Energy Collection at Oregon State University** ,1990 *Nuclear Holocausts* Paul Brians,1987 The anxiety caused by the thought of nuclear war causes some people to avoid the topic altogether some to despair and others to place unwarranted confidence in scientific or governmental control However the vivid characters and realistic settings of fiction can bring home the impact of a nuclear war in a way that makes the topic difficult to avoid and allows readers to confront their fears and phobias This bibliography study is the only compilation of its kind to deal exclusively with nuclear war in fiction The first five chapters provide a historical survey of the development of the nuclear war theme and a study of the causes and aftermath of nuclear war as treated in literature In addition Brians considers the significant failure of some works to confront the subject and the success of others as educational tools With a clear focus on the subject of war this work does not deal with such related topics as nuclear accidents reactor disasters or near war situations The bulk of the book is given over to the detailed annotated bibliography which consists of over 800 entries with associated checklists Intended to provide scholars librarians and general readers with ready access to a great variety of information about his body of writing the bibliography lists both hardcover and paper editions of books and the reprinting of each short story and corrects several errors in other standard reference works In his critical analysis and through the annotations in the bibliography Brians attempts to improve our understanding of cultural attitudes toward the dangers posed by the ever present reality of nuclear weaponry Jacket
