*The Apocalypse Factory* Steve Olson, 2020-07-28 A thrilling narrative of scientific triumph decades of secrecy and the unimaginable destruction wrought by the creation of the atomic bomb It began with plutonium the first element ever manufactured in quantity by humans Fearing that the Germans would be the first to weaponize the atom the United States marshaled brilliant minds and seemingly inexhaustible bodies to find a way to create a nuclear chain reaction of inconceivable explosive power In a matter of months the Hanford nuclear facility was built to produce and weaponize the enigmatic and deadly new material that would fuel atomic bombs In the desert of eastern Washington State far from prying eyes scientists Glenn Seaborg Enrico Fermi and many thousands of others the physicists engineers laborers and support staff at the facility manufactured plutonium for the bomb dropped on Nagasaki and for the bombs in the current American nuclear arsenal enabling the construction of weapons with the potential to end human civilization With his characteristic blend of scientific clarity and storytelling Steve Olson asks why Hanford has been largely

overlooked in histories of the Manhattan Project and the Cold War Olson who grew up just twenty miles from Hanford's B Reactor recounts how a small Washington town played host to some of the most influential scientists and engineers in American history as they sought to create the substance at the core of the most destructive weapons ever created The Apocalypse Factory offers a new generation this dramatic story of human achievement and ultimately of lethal hubris

Gavin,2012-10-11 We are at a critical juncture in world politics Nuclear strategy and policy have risen to the top of the global policy agenda and issues ranging from a nuclear Iran to the global zero movement are generating sharp debate The historical origins of our contemporary nuclear world are deeply consequential for contemporary policy but it is crucial that decisions are made on the basis of fact rather than myth and misapprehension In Nuclear Statecraft Francis J Gavin challenges key elements of the widely accepted narrative about the history of the atomic age and the consequences of the nuclear revolution On the basis of recently declassified documents Gavin reassesses the strategy of flexible response the influence of nuclear weapons during the Berlin Crisis the origins of and motivations for U S nuclear nonproliferation policy and how to assess the nuclear dangers we face today In case after case he finds that we know far less than we think we do about our nuclear history Archival evidence makes it clear that decision makers were more concerned about underlying geopolitical questions than about the strategic dynamic between two nuclear superpowers Gavin's rigorous historical work not only tells us what happened in the past but also offers a powerful tool to explain how nuclear weapons influence international relations Nuclear Statecraft provides a solid foundation for future policymaking **It's Your Atomic Age** Lester Del Rey,1951 **The First Atomic Age** Matthew Lavine,2013-06-05 At the close of the 19th century strange new forms of energy arrested the American public's attention in ways that no scientific discovery ever had before This groundbreaking cultural history tells the story of the first nuclear culture one whose lasting effects would be seen in the familiar atomic age of the post war twentieth century **The Manhattan Project** Michael B.
