Atomic Collisions In Solids:

Atomic Collisions in Solids Sheldon Datz, B. R. Appleton, C. D. Moak, 2013-11-21 Perhaps the most controversial aspect of this volume is the number V assigned to the conference in this series. Actually the first conference to be held under the title Atomic Collisions in Solids was held at Sussex University in England in 1969 and the second at Gausdal Norway in 1971 which would logically make the conference held at Gatlinburg Tennessee U S A in 1973 the third III. However the appearance of the proceedings of the 1971 Gausdal Conference published by Gordon and Breach bore the number IV. The reasoning behind this was that in fact two previous conferences had been largely dedicated to the same subject area. The first of these was at Aarhus Denmark in 1965 and the second in 1967 was held in Chalk River Canada. Hence the number V for the 1973 meeting. Page v

The Observation of Atomic Collisions in Crystalline Solids R. S. Nelson, 2013-10-22 The Observation of Atomic Collisions in Crystalline Solids presents a critical account of the more important experiments which have provided the basis for a better understanding of atomic collision phenomena in crystalline solids. Collisions have been divided into two artificial regimes: primary collisions which deal with the interaction of the incident particles with the solid and secondary collisions which deal with those events which occur as a result of lattice atoms recoiling from primary encounters. Although the book is intended principally for the experimentalist, some simple theoretical models have been introduced. It is hoped that the book

will provide a useful introduction to the subject of atomic collisions in solids for the post graduate research student as well as providing a collection of the most important experimental data for established scientists actively engaged in the field It is also intended to provide a background for the technologist engaged in such fields as the ion implantation doping of semiconductors
