Clarke, 2018-03-08 Ronald

Fairbairn developed a thoroughgoing object relations theory that became a foundation for modern clinical thought. This volume is homage to the enduring power of his thinking and of his importance now and for the future of relational thinking within the social and human sciences. The book gathers an international group of therapists, analysts, psychiatrists, social commentators and historians who contend that Fairbairn's work extends powerfully beyond the therapeutic. They suggest that social, cultural and historical dimensions can all be illuminated by his work. Object relations as a strand within psychoanalysis began with Freud and passed through Ferenczi and Rank, Balint, Suttie and Klein to come of age in Fairbairn's papers of the early 1940s. That there is still life in this line of thinking is illustrated by the essays in this collection and by the modern relational turn in psychoanalytic theory, the development of attachment theory and the increasing recognition that there is no such thing as an ego without context, without relationships, without a social milieu.

Forensic Aspects of Dissociative Identity Disorder Graeme Galton, Adah Sachs, 2018-03-28. This ground breaking book examines the role of crime in the lives of people with Dissociative Identity Disorder, formerly known as Multiple Personality Disorder, a condition which appears to be caused by prolonged trauma in infancy and childhood. This trauma may be linked with crimes committed against them, crimes they have witnessed and crimes they have committed under duress. This collection of essays by a range of distinguished international contributors explores the complex legal, ethical, moral and clinical questions which face psychotherapists and other professionals working with people suffering from Dissociative Identity Disorder. Contributors to this book are drawn from a wide range of professions including psychotherapy, psychoanalysis, counselling, psychology, medicine, law, police and social work.

Cognitive Sciences and Medieval Studies Juliana Dresvina, Victoria Blud, 2020-11-01. This study brings together medieval studies and cognitive methodologies in a study specifically aimed at medievalists. It presents a longer history of certain mental health conditions and locates contemporary debates about the mind in a broader historical framework. It considers both the benefits of incorporating insights from contemporary neuroscientific and cognitive studies into the exploration of the past and the benefits of employing historical models and case studies in order to reflect on modern methods.

Madness or Knowing the Unbearable Truth Tova Zaltz, 2018-11-01. *The Impossible Choice* offers readers a narrative of the relationship between a therapist and her patient who desperately wants to discover her past. With no memory and no way of knowing what was real, her long therapeutic journey was to last 26 years, half her lifetime. Her only reality was the life she lived in the presence of her therapist. The narrative unfolds to reveal a story of horrific events that must be hidden yet can no longer be kept secret. It sheds light on how chronic long term traumatisation within a closed family circle can create madness in a vulnerable and lonely child and helps reader gain an understanding of the enigmatic phenomena of Dissociated Identity Disorder. Having been terrorized into silence, destroying her ability to use language in a house of secrets and lies, the therapy reveals how this patient struggles to come out of her autistic like state in search of ways to find her past, her self and her voice. In this struggle the reader becomes an audience exposed to the birth of dissociative

personae who come forth to tell her story As language slowly unfolds she begins to share a first hand account albeit in written form of the most complex psychological forces involved in a victim of incest who simultaneously loves hates and is terrorized by her lover father Through live vignettes it demonstrates how external violence can create inner violence that threatens to annihilate the soul leaving only a body to survive The book provides an original contribution to our understanding of the complex psychological forces involved in incest featuring the patient s own coherent written texts mediated by her therapist The former s remarkable insights represent essential reading for all readers involved in policy development for the protection of children at high risk of suffering abuse
