## **Attacking Extreme Poverty:**

*Participatory Approaches to Attacking Extreme Poverty* Xavier Godinot, Quentin Wodon, 2006-01-01 Relying on contributions from the International Movement ATD Fourth World this book deals with questions such as What does it mean to live in poverty and especially in extreme poverty How can very poor people be reached through development projects How can we assess whether projects succeed in changing the lives of the poorest individuals In answering these questions the emphasis is on exploring what type of knowledge is needed to fight extreme poverty A key argument is that apart from academic knowledge a concerted effort is needed to listen to the knowledge of poor people themselves as well as to the knowledge of practitioners who are engaged with them on a daily basis to fight poverty After the introductory chapter the text of a speech by Joseph Wresinski founder of the International Movement ATD Fourth World at a congress of social scientists held at UNESCO is reproduced The next contribution is based on comments by the International Movement ATD Fourth World on the World Bank's World Development Report 2004 Making Services Work for Poor People Thereafter case studies are provided on participatory approaches to attacking extreme poverty in both developing countries Madagascar and Tanzania as well as Bolivia Guatemala and Peru and developed countries the United States and Belgium

Anheier,Stefan Toepler,2009-11-24 Recently the topic of civil society has generated a wave of interest and a wealth of new information Until now no publication has attempted to organize and consolidate this knowledge The International Encyclopedia of Civil Society fills this gap establishing a common set of understandings and terminology and an analytical starting point for future research Global in scope and authoritative in content the Encyclopedia offers succinct summaries of core concepts and theories definitions of terms biographical entries on important figures and organizational profiles In addition it serves as a reliable and up to date guide to additional sources of information In sum the Encyclopedia provides an overview of the contours of civil society social capital philanthropy and nonprofits across cultures and historical periods For researchers in nonprofit and civil society studies political science economics management and social enterprise this is the most systematic appraisal of a rapidly growing field World Development Report 1980 ,1980 Abstract Developing countries start the decade facing two major challenges to continue the social and economic progress of the past 30 years in an international climate that looks less helpful and to tackle the plight of the 800 million people living in absolute poverty who have benefitted too little from past progress This report examines some of the difficulties and prospects in both areas One of its central themes is the importance of people in development The first part of the report addresses the expected sluggish world economic growth as oil importing countries reduce their current account deficits and adapt to higher energy costs Domestic policies of developing countries will be crucial and the fate of poor people in these countries will be decided largely by domestic opportunities and policies The second part of the report describes the role of human development programs in education health nutrition and fertility reduction and their related effects on productivity and population growth **Development and Faith** Katherine Marshall,Marisa Bronwyn Van Saanen,2007 Publisher s description The faith and development nexus is both a promising new focus for secular development agencies and a historic

reality for centuries world faiths and individuals inspired by their faith have played many roles in social change and social welfare Secular development agencies have largely operated in parallel to the world of faith motivated development The World Bank began in the late 1990s to explore ways in which faith and development are connected The issue was not and is not about religion but about the recognition that some of the best experts on development are faith leaders living and working in poor communities where strong ties and moral authority give them unique experience and insight The World Bank's goal is to act as a catalyst and convenor bringing together development practitioners to find common ground understand one another's efforts and explore differences Development and Faith explores and highlights promising partnerships in the world between secular and faith development entities It recounts the evolving history of relationships between faith and secular development institutions It focuses on the Millennium Development Goals as a common framework for action and an opportunity for new forms of collaboration and partnership
