this book is to study the costs related to individuals with ADHD who have not been diagnosed and who have not received treatment In this respect the study makes a unique contribution to scientific knowledge by investigating the cost of untreated ADHD The study investigates the extent to which individuals with undiagnosed ADHD in childhood fare differently compared to otherwise similar individuals without ADHD A long list of important parameters in an individual s life e g educational attainment occupational status income family situation criminal record health is examined The results of the study provide not just cost estimates of ADHD per se but also create a point of reference which will be highly relevant for the evaluation of any future treatment for ADHD The clear picture emerging from this study is that ADHD is associated with considerable private and social costs reflecting that Adults with ADHD exhibit weak performance across all applied measures These findings remain even when adults with ADHD are compared to a control group of their own siblings Even though the study is performed for Denmark it is argued that generalizability of the established results beyond Denmark is valid *Handbook of Disruptive Behavior Disorders* Herbert C. Quay, Anne E. Hogan, 2013-11-11 The purpose of this Handbook is to provide the researcher clinician teacher and student in all mental health fields with comprehensive coverage of Disruptive Behavior Disorders Attention Deficit Hyperactivity Disorder Conduct Disorder and Oppositional Defiant Disorder With over 50 contributors and 2600 references this Handbook is the most complete resource available on this important topic
