Attracting High Technology Investment Intels Costa Rican Plant:

Attracting High Technology Investment Debora L. Spar, 1998-01-01 This paper examines Intel Corporation's 300 million semiconductor assembly and testing plant in Costa Rica. It discusses various ways in which countries can gradually improve their climate for foreign investment and the design of their investment promotion strategies. **OECD Global Forum on International Investment New Horizons for Foreign Direct Investment** OECD, 2002-03-05 The OECD Global Forum on International Investment at its inaugural meeting in Mexico City in November 2001 provided a unique platform for participants originating from OECD and non-OECD economies to address the challenges posed by FDI. These conference papers add to the existing literature on FDI. **Global Investment Competitiveness Report 2019/2020** World Bank, 2020-07-06 The Global Investment Competitiveness Report 2019/2020 provides novel analytical insights, empirical evidence, and actionable recommendations for governments seeking to enhance investor confidence in times of uncertainty. The report's findings and policy recommendations are organized around 3 ICs; they provide guidance to governments on how to increase investments, contributions to their country's development, enhance investor confidence, and foster their economies' investment competitiveness. The report presents results of a new survey of more than 2,400 business executives representing FDI in 10 large developing countries: Brazil, China, India, Indonesia, Malaysia, Mexico, Nigeria, Thailand, Turkey, and Vietnam. The results show that over half of surveyed foreign businesses have already been adversely affected by policy uncertainty, experiencing a decrease in employment, firm productivity, or investment. Foreign investors report that supporting political environments, stable macroeconomic conditions, and conducive regulatory regimes are their top three investment decision factors. Moreover, the report's new global database of regulatory risk shows that predictability and transparency increase investor confidence and FDI flows. The report also assesses the impact of FDI on poverty, inequality, employment, and firm performance using evidence from various countries. It shows that FDI in developing countries yields benefits to their firms and citizens, including more and better paid jobs, but governments need to be vigilant about possible adverse consequences on income distribution. The report is organized in 5 chapters. Chapter 1 presents the results of the foreign investor survey. Chapter 2 explores the differential performance and development impact of greenfield FDI, local firms acquired by multinational corporations, i.e. brownfield FDI, and domestically owned firms using evidence from six countries. Chapter 3 assesses the impact of FDI on poverty, inequality, employment, and wages using case study evidence from Ethiopia, Turkey, and Vietnam. Chapter 4 presents a new framework to measure FDI regulatory risk that is linked to specific legal and regulatory measures. Chapter 5 focuses on factors for increasing the effectiveness of investment promotion agencies. *An Analysis of Robert E. Lucas Jr.'s Why Doesn't Capital Flow from Rich to Poor Countries?* Pádraig Belton, 2017-07-05 Robert Lucas is known among economists as one of the most influential macroeconomists of recent times, a reputation founded in no small part on the critical thinking skills displayed in his seminal 1990 paper *Why Doesn't Capital Flow from Rich to Poor Countries*.

Lucas's paper tackles a puzzle in economic theory that has since come to be known as the Lucas paradox and it deploys the author's brilliant problem solving skills to explain why such an apparent paradox in fact makes sense. Classical economic theory makes a simple prediction of how capital flows between countries: it should flow from rich to poor countries because of the law of diminishing returns on capital. Since poor countries have so little capital invested in them, the returns on new investment should be proportionally far better than investment in rich countries. This should mean that investors seeking new opportunities will invest in poorer countries, making capital consistently flow from rich nations to poorer ones. But problematically, this is not in fact the case. Having defined the problem, Lucas did what any good problem solver would do: he looked critically at the criteria involved and offered a series of possible solutions. Indeed, in just six pages, he puts forward four hypotheses to explain the paradox's existence. The popularity of his paper and the influence it has had are also greatly magnified by careful reasoning embodied in Lucas's marshalling of evidence and his explanations of the judgements he has made.

Caribbean Basin Economic Recovery Act Impact on U.S. Industries and Consumers, 14th Report 1998 and Andean Trade Preference Act Impact on the U.S. Industries and Consumers, 6th Report 1998, Invs. 332-227 and 332-352, [World Investment Report](#), 2003 [Russian Trade Policy Reform for WTO Accession](#) Harry G. Broadman, 1998-01-01. Russia has manifested considerable interest in accession to the World Trade Organization (WTO). This volume contains four policy papers that focus on the most prominent topics during the ongoing WTO accession process: 1) the dispersion of Russia's tariff structure; 2) trade and investment in the service sectors; 3) the treatment of state trading enterprises; and 4) the policy regime governing foreign direct investment. Bringing the Russian Federation into the rules-based WTO system is an objective broadly shared by the world community. Accession to the WTO comes at a critical juncture for the Russian government to focus on many important policy issues to stimulate growth. As part of the process of making liberalization commitments as required by the existing members of the WTO, accession provides an opportunity to lock in reforms.

Human Development Report 2001, [Harnessing Globalization](#) Roy C. Nelson, 2009-07-27. How can countries in the underdeveloped world position themselves to take best advantage of the positive economic benefits of globalization? One avenue to success is the harnessing of foreign direct investment (FDI) in the nontraditional forms of the high technology and service sectors where an educated workforce is essential and the spillover effects to other sectors are potentially very beneficial. In this book, Roy Nelson compares efforts in three Latin American countries: Brazil, Chile, and Costa Rica to attract nontraditional FDI and analyzes the reasons for their relative success or failure. As a further comparison, he uses the successes of FDI promotion in Ireland and Singapore to help refine the analysis. His study shows that two factors in particular are critical: first is the government's autonomy from special interest groups, both domestic and foreign, arising from the level of political security enjoyed by government leaders. The second factor is the government's ability to learn about prospective investors and the inducements that are most important to them, what he calls transnational learning capacity.

Nelson draws lessons from his analysis for how governments might develop more effective strategies for attracting nontraditional FDI **Foreign Investment in Latin America and the Caribbean 2007** United Nations Publications,2008-10 This report provides an overview of Foreign Direct Investments FDI flows to and from Latin America and the Caribbean in 2007 It also examines the recent activities of transnationals in the region and of trans Latinos outside their home countries It further explores three topics investment in hardware for information and communications technologies ICT investment in telecommunications services and Canadian investment in Latin America and the Caribbean

Competitiveness in Small Developing Economies Alvin G. Wint,2003 Possibly no group is more conscious of the challenges created by the increasing integration of markets for capital labour products and information than small developing economies Policy makers from these economies have sought a two track response to this integration One response lies in increasing lobbying efforts for these economies to be accorded special or more equitable treatment in market integration discussions The second response lies in improving the competitiveness of their economies It is this second response that provides the subject matter for this book It explores the challenges and opportunities associated increasing competitiveness in small developing economies based on research conducted in the Caribbean The topics covered indicate the breadth of activity that is required to enhance competitiveness At the macro policy level the book explores the key drivers of competitiveness examines the role of exchange rate regimes and of government policy considers the implications sovereignty and assesses the extent to which competitiveness likely to be improved by attracting foreign direct investment

New Horizons for Foreign Direct Investment Organisation for Economic Co-operation and Development,Global Forum on International Investment,2002 The global economic slowdown and the significant decline in foreign direct investment FDI have made it even more imperative to attract international investment in order to achieve sustainable development and poverty reduction The need to maximise the benefits of FDI compels host and home governments to move beyond the traditional policy of liberalising FDI A broader set of policies for an enabling environment for investment must be embraced competition taxation financial markets trade corporate governance public administration respect for workers and environmental rights and other public policy goals Developing policy frameworks to ensure that multinational enterprises contribute to development goals and capacity building also remain a priority issue on the international agenda The OECD Global Forum on International Investment at its inaugural meeting in Mexico City in November 2001 provided a unique platform for participants originating from OECD and non OECD economies representing academia business and labour and civil society to address the challenges posed by FDI These selected conference papers add to the existing literature on FDI They highlight the principal conclusions include analyses of recent FDI trends and prospects and discuss ways of maximising the benefits of FDI for development The papers also examine lessons learned in OECD and non OECD economies governments responsibilities in FDI policies corporate responsibility initiatives and the role of multilateral organisations in

capacity building for FDI in host countries The Role of the State in Competition and Intellectual Property Policy in Latin America Beatriz Boza,2000 *Economic Development in Central America: Growth and internationalization* Felipe Larraín B.,2001 **Economic Development in Central America** Felipe Larraín B.,2001 A Guide to the World Bank World Bank,2003 The World Bank Group works in more than 100 developing economies and is one of the world s largest sources of development assistance In 2002 the institution provided US 19 5 billion in loans to its client countries This guide reviews the organisation s history objectives and operations and looks at the five institutions that make up the World Bank Group the International Bank for Reconstruction and Development IBRD the International Development Association IDA the International Finance Corporation IFC the Multilateral Investment Guarantee Agency MIGA and the International Centre for Settlement of Investment Disputes ICSID **World Bank Group Publications ... Catalog of Publications World Bank Group,2000 Complete current catalog of all print and online journals and monographs Improving Russia's Policy on Foreign Direct Investment Joel Bergsman,Harry G. Broadman,Vladimir Drebenstov,2000 Russia gets relatively little foreign direct investment and almost none of the newer more efficient kind involving state of the art technology and world class competitive production linked to dynamic global or regional markets Why And what should be done about it **Lessons from NAFTA for Latin America and the Caribbean** Daniel Lederman,William Francis Maloney,Luis Servén,2005 Annotation Analyzing the experience of Mexico under the North American Free Trade Agreement NAFTA *Lessons from NAFTA* aims to provide guidance to Latin American and Caribbean countries considering free trade agreements with the United States The authors conclude that the treaty raised external trade and foreign investment inflows and had a modest effect on Mexico s average income per person It is likely that the treaty also helped achieve a modest reduction in poverty and an improvement in job quality This book will be of interest to scholars and policymakers interested in international trade and development
