Recording and Producing Audio for Media Stanley R. Alten, 2011-10 Presents an introduction to the techniques and principles of each stage of the audio production process. *Kids and Media in America* Donald F. Roberts, Ulla G. Foehr, 2004 This 2003 book reports the only national random sample survey of US children and adolescents' use of all of the various media available to them conducted in at least the past 30 years. In addition to providing the first comprehensive look at how media saturated our young people's lives have become, it is the first study to examine young people's overall media budgets and the first to attempt to describe distinctly different types of young media users. Extensive background information and chapters devoted to each of the various media, to the overall media budget and to particular types of media users enables the authors to describe perhaps the most detailed map of US young people's media behavior ever assembled. *Pro Android Media* Shawn Van Every, 2011-07-29 Mobile devices have evolved to focus on rich media production and consumption. Developers of mobile applications are able to create applications that allow people to play, capture and share media in a variety of new ways on mobile devices. The popularity of Android has soared in part because the platform offers developers a rich set of capabilities including access to media capturing and playback functions. *Pro Android Media* provides concise and clear instruction on how to utilize the media APIs made available through Android to create dynamic apps. It takes you from a simple means to gain access to the camera to complex video capture and sharing examples. It also covers sound, graphics, painting and more everything you need to make your app come alive. After reading this book, the app you create will showcase the best of multimedia that Android has to offer.

Media and the American Child George Comstock, Erica Scharrer, 2010-07-27 *Media and the American Child* summarizes the research on all forms of media on children, looking at how much time they spend with media, everyday television programming and its impact on children, how advertising has changed to appeal directly to children and the effects on children and the consumer behavior of parents, the relationship between media use and scholastic achievement, the influence of violence in media on anti-social behavior and the role of media in influencing attitudes on body image, sex and work roles, fashion, lifestyle. The average American child aged 2-17 watches 25 hours of TV per week, plays 1 hr per day of video or computer games and spends an additional 36 min per day

on the internet 19% of children watch more than 35 hrs per week of TV This in the face of research that shows TV watching beyond 10 hours per week decreases scholastic performance In 1991 George Comstock published *Television and the American Child* which immediately became THE standard reference for the research community of the effects of television on children Since then interest in the topic has mushroomed as the availability and access of media to children has become more widespread and occurs earlier in their lifetimes No longer restricted to television media impacts children through the internet computer and video games as well as television and the movies There are videos designed for infants claiming to improve cognitive development television programs aimed for younger and younger children even pre literates computer programs aimed for toddlers and increasingly graphic interactive violent computer games Presents the most recent research on the media use of young people Investigates the content of children s media and addresses areas of great concern including violence sexual behavior and commercialization Discusses policy making in the area of children and the media Focuses on experiences unique to children and adolescents
