**Illinois Audubon Bulletin** Illinois Audubon Society,1920 **The Audubon Bulletin** ,1916 ... The Domestic Cat  
Edward Howe Forbush,1916 Cats and Conservationists Dara M. Wald,Anna L. Peterson,2020-03-15 Cats and  
Conservationists is the first multidisciplinary analysis of the heated debate about free roaming cats The debate pits  
conservationists against cat lovers who disagree both on the ecological damage caused by the cats and the best way to  
manage them An impassioned and spirited conflict it also sheds light on larger questions about how we interpret science  
incorporate diverse perspectives and balance competing values in order to encourage constructive dialogue on contentious  
social and environmental issues On one side of the cat debate stand many environmentalists especially birders and  
conservation organizations who believe that outdoor cats seriously threaten native wildlife On the other side are many animal  
welfare advocates who believe that outdoor cats generally do not pose a major ecological threat and that it is possible for  
cats and wildlife to coexist They believe that it is possible mainly through trap neuter return projects TNR to keep free  
roaming cat populations in check without killing large numbers of cats Careful analysis suggests that there remain important  
questions about the science on both cat predation and TNR effectiveness Yet both sides of the conflict insist that the evidence  
is clear cut This false certainty contributes to conflict between conservationists and cat lovers and obscures common goals  
that could generate constructive discussions and collaborative efforts among scientists policymakers ... conservationists and  
animal welfare advocates Cats and Conservationists aims to facilitate such collaboration in order to manage outdoor cats and  
minimize the damage they cause It also offers models for constructive debates about the public role of science in other  
polarized public conflicts over science and environmental topics The Rise of the American Conservation Movement  
Dorceta E. Taylor,2016-08-04 In this sweeping social history Dorceta E Taylor examines the emergence and rise of the  
multifaceted U S conservation movement from the mid nineteenth to the early twentieth century She shows how race class  
and gender influenced every aspect of the movement including the establishment of parks campaigns to protect wild game  
birds and fish forest conservation outdoor recreation and the movement s links to nineteenth century ideologies Initially led  
by white urban elites whose early efforts discriminated against the lower class and were often tied up with slavery and the  
appropriation of Native lands the movement benefited from contributions to policy making knowledge about the environment  
and activism by the poor and working class people of color women and Native Americans Far ranging and nuanced The Rise  
of the American Conservation Movement comprehensively documents the movement s competing motivations conflicts
