**Charlotte Brontë's World of Death** Robert Keefe,2014-08-01 By the age of eight Charlotte Bront had lost first her mother and then her two older sisters Later in a second wave of deaths her brother and two younger sisters died leaving her a sole survivor With subtlety and imagination Robert Keefe examines Bront s works as the creative response to these losses particularly the loss of her mother Terrified and yet fascinated by death struggling with guilt remorse and a deep sense of rejection Charlotte Bront found in art a way to come to terms with death through its symbolic reenactment In her earlier writings she created a fictional world marked by devices that allow her to control or deny death In her later works these mechanisms evolved into mature expressions of a profound psychological reality Bront s preoccupation with death is seen in her fiction in the recurring patterns of separation and exile Keefe traces the development of these motifs in the juvenilia and the four novels *The Professor* *Jane Eyre* *Shirley* and *Villette* Unique in its emphasis on the maternal relationships in Bront s life and art this study also explores certain aspects of her life that have often puzzled biographers
