Charting Global Responsibilities:

CHARTING GLOBAL RESPONSIBILITIES, 1997 *World Philosophies* Ninian Smart, 1999 *World Philosophies* is a comprehensive survey of the world's philosophical and religious traditions by one of our foremost religious thinkers Ninian Smart discusses notable figures such as Plato and Kierkegaard in the West the Buddha and Mao Zedong in Asia Tempels and Knibanga in Africa and Rodo and Royce in America Covering a wide range of topics including Indian ideas of testimony and evidence Chinese notions of moral development Buddhist concepts of cosmology and Latin American critiques of materialism Smart sheds new light on the astonishing diversity of philosophies that have developed throughout history *The Politics of Dialogue* Ranabir Samaddar, 2017-07-05 Offering a detailed analysis of post colonial South Asia *The Politics of Dialogue* discusses the creation and impact of borders and the pervasive tension between the new nations It critiques existing knowledges and techniques which guide our understanding of post colonial politics of war and peace and stresses the importance of dialogue in such situations as well as pointing out the reasons behind the failure to take up dialogue seriously

Economics as a Moral Science Peter Rona, Laszlo Zsolnai, 2017-04-13 The book is reclaiming economics as a moral science It argues that ethics is a relevant and inseparable aspect of all levels of economic activity from individual and organizational to societal and global Taking ethical considerations into account is needed in explaining and predicting the behavior of economic agents as well as in evaluating and designing economic policies and mechanisms The unique feature of the book is that it not only analyzes ethics and economics on an abstract level but puts behavioral institutional and systemic issues together for a robust and human view of economic functioning It sees economic facts as interwoven with human intentionality and ethical content a domain where utility calculations and moral considerations co determine the behavior of economic agents and the outcomes of their activities The book employs the personalist approach that sees human persons endowed with free will and conscience as the basic agents of economic life and defines human flourishing as the final end of economic activities The book demonstrates that economics can gain a lot in meaning and also in analytical power by reuniting itself with ethics *Human Rights* Albert A. Zinnos, 2007 Human rights refers to the concept of human beings as having universal rights or status regardless of legal jurisdiction and likewise other localising factors such as ethnicity and nationality For many the concept of human rights is based in religious principles However because a formal concept of human rights has not been universally accepted the term has some degree of variance between its use in different local jurisdictions difference in both meaningful substance as well as in protocols for and styles of application Ultimately the most general meaning of the term is one which can only apply universally and hence the term human rights is often itself an appeal to such transcended principles without basing such on existing legal concepts The term humanism refers to the developing doctrine of such universally applicable values and it is on the basic concept that human beings have innate rights that more specific local legal concepts are often based Within particular societies human rights refers to standards of

behaviour as accepted within their respective legal systems regarding 1 the well being of individuals 2 the freedom and autonomy of individuals and 3 the representation of the human interest in government These rights commonly include the right to life the right to an adequate standard of living the prohibition of genocide freedom from torture and other mistreatment freedom of expression freedom of movement the right to self determination the right to education and the right to participation in cultural and political life These norms are based on the legal and political traditions of United Nations member states and are incorporated into international human rights instruments This new book brings together the latest book literature centred on this crucial topic
