Attention And Performance:

Attention and Performance XIV David E. Meyer, Sylvan Kornblum, 1993 *Attention and Performance XIV* provides a broad historic and timely synthesis of the empirical and theoretical ideas on which performance theory now rests

Attention and Performance VIII Raymond S. Nickerson, 1980 First Published in 1980 Routledge is an imprint of Taylor Francis an informa company

Cognitive Regulation of Performance Daniel Gopher, 1999 *Attention and Arousal* Michael Eysenck, 2012-12-06 The thinker who has a mortal fear of being wrong will give all that is valuable in himself to that little ambition Walter Lippmann 1914 Psychology has always been plagued by passing fads and fan cies to a greater extent than is seemly in a scientific discipline Over the past few years the Zeitgeist can be summed up by the two words cognitive psychology Indeed a recent poll of academic psychologists in American indicated that over 80% of them regarded themselves as cognitive psychologists Cognitive psychology is in the ascendant but it has never been clear to me that it has addressed all of the appropriate is sues In particular information processing in the real world and even in the laboratory occurs within a motivational and emotional context but cognitive psychologists usually main tain the convenient fiction that cognition can fruitfully be stud ied in isolation The main reason for writing this book was to at tempt to demonstrate that there can be a useful cross fertiliza tion between cognitive and motivational emotional psycholo gy and that there are already tantalizing glimpses of the poten tial advantages of such inter disciplinary research The ideas of Donald Broadbent and his associates have exer cised a formative influence during the writing of this book They discovered some years ago that there are intriguing simi larities as well as differences in the effects on performance of such apparently quite disparate factors as white noise time of day introversion extraversion and incentive

Attention and Performance XII Max Coltheart, 2016-09-19 Originally published in 1987 this volume presented a comprehensive state of the art account of what was known about the psychology of reading at the time All the fundamental aspects of reading are considered visual attention visual feature analysis visual masking letter and word recognition priming effects eye movements in reading phonological processing working memory and reading parsing sentence comprehension and text integration The subject of reading is approached from a variety of different theoretical perspectives including cognitive psychology connectionism neuropsychology and linguistics This broad and comprehensive review will still be of value for undergraduate and graduate teaching as well as research workers engaged in experimental or theoretical investigations of any aspect of the psychology of reading

Attention and Performance XVII Daniel Gopher, Asher Koriat, 1999 In 1966 the first meeting of the Association for the Study of Attention and Performance was held in the Netherlands to promote the emerging science of cognitive psychology This volume is based on the most recent conference held in Israel thirty years later The focus of the conference was the interaction between theory and application The organizers chose the specific topic cognitive regulation of performance because it is an area where contemporary theories of cognitive processes meet the everyday challenges posed by human

interactions with complex systems Present day technological systems impose on the operator a variety of supervisory functions such as input and output monitoring allocation of cognitive resources choice of strategies and regulation of cognitive operations A challenge for engineers and designers is to accommodate the cognitive requirements called for by these systems The book is divided into four sections the presentation and representation of information cognitive regulation of acquisition and performance consciousness and behavior and special populations aging and neurological disorders Contributors Nicole D Anderson Moshe Bar Lynn Bardell Alice E Barnes Irving Biederman Robert A Bjork Richard A Block Fergus I M Craik Heiner Deubel John Dunlosky Ido Erev Ronald Fisher John M Flach Barry Goettl Morris Goldsmith Daniel Gopher Lynn Hasher Okihide Hikosaka Larry L Jacoby Peter Kalocsai Colleen Kelley David E Kieras Roberta Klatzky Asher Koriat Arthur F Kramer Elisabetta Ladavas John L Larish Susan J Lederman John Long Cynthia P May Guiliana Mazzoni Brian McElree David Meyer Satoru Miyauchi Neville Moray Louis Narens Thomas O Nelson Raymond S Nickerson Lynne Reder J Wesley Regian Ian Robertson Wolfgang Schneider Christian D Schunn Wayne Shebilske Shinsuke Shimojo Suresh Subramaniam Tom N Trainham Jehoshua Tsal Timothy A Weber Christopher Wickens Rose T Zacks Dan Zakay

Attention and Performance VI Stanislav Dornič, 2022-08-19 Originally published in 1977 this sixth volume of an international series presented new and original material in the broad area of human performance Included are the most recent findings modern methodologies and latest models and theories that indicate the trends and focus on recent points of debate Among the topics covered are reaction processes perceptual encoding selective attention visual search processing a recognition of words as well as the reading process and memory This volume will be of paramount interest to experimental psychologists from graduate students to post graduate research workers *Sustained Attention in Human Performance* Joel S. Warm, 1984-12-12 A detailed and critical treatment of research in sustained attention or vigilance by specialists in each sub area Provides a thorough overview of the area with many suggestions for future research Extensively reviews the difficult problems in real world applications in areas such as quality control air traffic control and nuclear power plant regulation Includes an extensive bibliography *Attention and Performance XI* Michael I. Posner, Oscar S. M. Marin, 1985 [Attention and Performance IX](#) John Long, Alan D. Baddeley, 1981 First published in 1984 Routledge is an imprint of Taylor Francis an informa company [Attention and Performance Xiii](#) Marc Jeannerod, 2018-12-07 Compiled as a result of the Thirteenth Symposium of the Association for Attention and Performance this collection focuses on the Symposium s theme Organization of Action The book is arranged in sections which provide a comprehensive view of the main issues raised during the meeting Several aspects of the theme were considered including the anatomical and physiological constraints on motor preparation and execution the influence of control proprioceptive cutaneous visual oculomotor signals the contribution of kinematics to the understanding of the underlying mechanisms and the role of cognitive constraints such as attention or learning in goal selection This new volume is of particular interest to professionals and researchers in cognitive psychology physiology and

neuropsychology as well as those studying motor skills **Attention and Performance** David E. Meyer, Sylvan Kornblum, 1993 Attention and Performance VI International Symposium on Attention and Performance, 1977 Attention and Performance XV Carlo Umiltà, Morris Moscovitch, 1994 During the past decade evidence of dissociation between conscious and nonconscious information processing has emerged from the study of normal subjects and brain damaged patients The thirty five original contributions in this book cover the latest work on this important topic During the past decade evidence of dissociation between conscious and nonconscious information processing has emerged from the study of normal subjects and brain damaged patients The thirty five original contributions in this book cover the latest work on this important topic across such traditional areas of research as vision face recognition spatial attention control processes semantic memory episodic memory and learning Each section is introduced by an overview chapter that presents and evaluates the available empirical evidence in a given area and is followed by several experimental papers The book opens with the Association Lecture by George Mandler On Remembering without Really Trying Hypermnesia Incubation and Mind Popping **Attention, Representation, and Human Performance** Slim Masmoudi, David Yun Dai, Abdelmajid Naceur, 2012 This volume presents a rare occasion where scholars from Europe North Africa and North America share their research programs and findings revolving around an important theme integration Despite different research foci and methodologies there is a strong consensus that we need to understand a psychological phenomenon in all its complexity involving its neural psychological and social dimensions involving perception and conception and decision processes involving motivation emotion and cognition all in complex interaction This volume is intended to reach out to basic and applied psychological researchers cognitive and affective scientists learning scientists biologists sociologists neuropsychological researchers and philosophers who have an interest in an integrated understanding of the mind at work particularly pertaining to explanations of real life phenomena that have social and practical significance A distinct feature of this volume is that most research involved is heavily built on neuropsychological evidence while loyal to the experimental tradition with its focus on functional behavior in various situations and conditions that mimic or resemble real life The viability of this approach to doing cutting edge research that is relevant and applicable to many real life phenomena should also make this body of research useful for a wide range of human endeavor from religion education to industrial and organizational psychology *Elements of Human Performance* Andries Frans Sanders, 1998 The book focuses on 2 aspects of human performance theory reaction processes and attention These aspects are often ignored by treatments of cognitive psychology but are central to understanding an individual's performance **Elements of Human Performance** F. Sanders, Andries Sanders, 2013-02-01 This book presents a review of research on reaction processes and attention as it has evolved over the last 40 years in the context of the information processing tradition in cognitive psychology It is argued and demonstrated that issues of reaction processes and attention are closely interconnected Their common conceptualization can

be seen in terms of limited processing capacity on the one hand and stage analysis on the other This volume concludes that at present a stage analysis metaphor offers better prospects as a conceptual starting point the limited capacity metaphor was strongly tied to the digital computers of the 60s The emphasis of the book is on behavioral research but summaries of related findings on evoked potentials and other psychophysiological variables are included as well From this perspective it may be of interest to neuropsychologists who want to learn about the present state of cognitive experimental paradigms Elements of Human Performance also addresses the question of the relationship between basic research and applications in the said areas This is particularly urgent in view of the now common notion that the results of many simplified laboratory tasks may be artifactual and of little applied value A back to back research strategy is outlined to assess the validity of basic research results for real life tasks
