

VOYAGE AU FOND DES MERS

Au Fond Des Oceanshc2003

Jules Cornet

Au Fond Des Oceanshc2003:

Voyage to Newfoundland Julien Thoulet, 2005-02-16 In his translation of Thoulet's travelogue Scott Jamieson remains faithful to the elegance and wit of the original. A Voyage to Newfoundland is full of intriguing detail about the landscape, local culture, origins of place names, flora, oceanography, and state of the French fishery. Several chapters are devoted to the fisheries and controversies over their exploitation, including ominous signs of early failure of the inshore cod fishery.

L'exploitation des ressources génétiques marines hors juridiction nationale Valérie Wyssbrod, 2017-10-10 The Exploitation of Marine Genetic Resources in Areas beyond National Jurisdiction by Valérie Wyssbrod begins by identifying the legal regime applicable to these underexploited resources which offer vast potential for the development of new drugs, bioplastics, depolluting products, and other innovations. The author then outlines provisions for a new treaty currently under discussion at the UN and presents alternatives to a new regime including revised legal instruments, the development of soft law, and the creation of an applicable ecolabel. Dans L'exploitation des ressources génétiques marines hors juridiction nationale Valérie Wyssbrod termine en premier lieu le régime juridique actuellement applicable ces ressources. Ces dernières représentent l'heure actuelle un potentiel énorme pour le développement de nouveaux médicaments, bioplastiques, polluants, etc. Encore peu exploitées, elles seront sans aucun doute au cœur d'un futur processus d'innovation et de nouveaux brevets. Dans un second temps, l'auteur dessine les contours et les principaux axes d'un nouveau traité spécifique, projet actuellement discuté à l'ONU. Valérie Wyssbrod explore finalement trois alternatives au nouveau traité: le remplacement du régime actuel par un autre régime existant, le développement d'un instrument de soft law, et la création d'un colabel.

Marine Genetic Resources, R&D and the Law 1 Bleuenn Guilloux, 2018-06-21 Advances in research and development reveal the immense diversity and potential of marine genetic resources. Under international law, no specific regime applies to these complex and paradoxical objects of use. The Law of the Sea Convention sets a framework that is partly inadequate for this new category of resources. The Biodiversity Convention and the Nagoya Protocol only address the genetic resources of national areas. Patents allow their holder to exercise a monopoly on exploiting biotechnological creations to extensive claims, questioning the common nature of biodiversity and related knowledge. They hinder research and the objectives of biodiversity law. The legal and practical rules of physical and functional access vary in geometry. They focus on the valorization of research results, crystallizing conflicts of interest between suppliers and users. Sustainable research and development is essential to the knowledge and protection of marine biodiversity. The qualification of marine genetic resources in common standard contractual tools, distributed research and development infrastructures, negotiation of an agreement on sustainable use and conservation of biodiversity beyond the limits of national jurisdiction would remove these inconsistencies.
