Auditing as Independent Authentication Peter W. Wolnizer, 2006 During the 1960s and 1970s a remarkable series of books was produced by academic staff in the field of accounting at the University of Sydney It was a period when academic research was largely analytical rather than empirically based For the most part the interests of academics at Sydney were largely directed at questioning the status quo either in the way accounting or auditing was practiced or in the conventional wisdom expressed in textbooks of the time The Sydney Accounting Classics series reflects the diversity of interests of the Sydney school at that time It also recognises the tremendous impact of the foundation professor of accounting R J Chambers This reprint series ensures that the ideas developed during this period remain available to new generations of scholars and researchers The Sydney Accounting Classics series is an initiative of the Accounting Foundation in association with Sydney University Press Auditing as Independent Authentication From the cover of the 1987 edition This is a penetrating exposition of the role of auditing in controlling quality of the financial information on which any interested person may assess the performance and prospects of firms
