[The Digital Bespoke?](#) ginger coons, 2021-11-29. The Digital Bespoke is about mass customization, 3D printing, human bodies and the step towards digitally built objects made to individual specifications. The author argues that the modes of customization offered by digital fabrication and mass production have more in common with their industrial predecessors than with craft-based customization. Using case studies of historical and current practices from Europe, Africa and North America to ground her theory, she investigates where digital fabrication technologies have developed from and how their uses differ from existing modes of production. Digital fabrication and mass customization are concepts encompassing broad ecosystems of technologies and practices. Both are increasingly implemented and hyped. As such, it is imperative to address not just their potential but their challenges. Written for a scholarly audience and for design practitioners concerned with the social and political impacts of digital fabrication and mass customization, this book will be a useful reference point for students and researchers in digital and analogue design, technology and material culture.

**Value Creation in Digital Platforms and Business Ecosystems** Victoria Slettl, Sabine Baumann, 2026-04-07. Digital platform organizations have become integral to everyday life, delivering services and products while reshaping entire industries. Yet platforms are only one manifestation of a broader phenomenon: digital business ecosystems. These ecosystems extend beyond single firms or platforms, encompassing networks of users, complementors, institutions and infrastructures that together
