computer systems that create artifacts musical pieces texts artworks in different styles The second section Perception explains methods for analyzing different styles and glean useful information viewing style as a form of communication The final section Interaction deals with reciprocal interaction between style producers and perceivers in areas such as interactive media improvised musical accompaniment and game playing The Structure of Style is written for researchers and practitioners in areas including information retrieval computer art and music digital humanities computational linguistics and artificial intelligence who can all benefit from this comprehensive overview and in depth description of current research in this active interdisciplinary field
