Bakunin, an Invention Horst Bienek, 1977 **The New Review** , 1892 *Karl Marx's Theory of Revolution Vol IV* Hal Draper, 1990 Much of Karl Marx's most important work came out of his critique of other thinkers including many socialists who differed significantly in their conceptions of socialism The fourth volume in Hal Draper's series looks at these critiques to illuminate what Marx's socialism was as well as what it was not Some of these debates are well known elements in Marx's work such as his writings on the anarchists Proudhon and Bakunin Others are less familiar such as the writings on Bismarckian socialism and Boulangism but promise to become better known and understood with Draper's exposition He also discusses the more general ideological tendencies of utopian and sentimental socialisms which took various forms and were ingredients in many different socialist movements *The British Library General Catalogue of Printed Books to 1975* British Library, Jim Emmett, 1979 [Fire in the Minds of Men](#) James Billington, 2017-10-24 This book traces the origins of a faith perhaps the faith of the century Modern revolutionaries are believers no less committed and intense than were Christians or Muslims of an earlier era What is new is the belief that a perfect secular order will emerge from forcible overthrow of traditional authority This inherently implausible idea energized Europe in the nineteenth century and became the most pronounced ideological export of the West to the rest of the world in the twentieth century Billington is interested in revolutionaries the innovative creators of a new tradition His historical frame extends from the waning of the French Revolution in the late eighteenth century to the beginnings of the Russian Revolution in the early twentieth century The theater was Europe of the industrial era the main stage was the journalistic offices within great cities such as Paris Berlin London and St Petersburg Billington claims with considerable evidence that revolutionary ideologies were shaped as much by the occultism and proto romanticism of Germany as the critical rationalism of the French Enlightenment The conversion of social theory to political practice was essentially the work of three Russian revolutions in 1905 March 1917 and November 1917 Events in the outer rim of the European world brought discussions about revolution out of the school rooms and press rooms of Paris and Berlin into the halls of power Despite his hard realism about the adverse practical consequences of revolutionary dogma Billington appreciates the identity of its best sponsors people who preached social justice transcending traditional national ethnic and gender boundaries When this book originally appeared *The New Republic* hailed it as remarkable learned and lively while *The New Yorker* noted that Billington pays great attention to the lives and emotions of individuals and this makes his book absorbing It is an invaluable work of history and contribution to our understanding of political life **The Babel Guide to German Fiction in English Translation** Ray Keenoy, Mike Mitchell (Translator), Maren Meinhardt, 1997 *The Babel Guide* is a new way in to the excitement of world fiction with lively original reviews and excerpts of the best books by the writers of Austria Germany and Switzerland It includes full listings of all translations published since 1950 A unique introduction to the wealth of fiction in translation *Babel Guides* is a new series on

 Hal Draper's incomparable treatment of Marx's political theory policy and practice In forceful and readable language Draper
 ranges through the development of the thought of Marx and Engels on the role of classes in society This series Karl Marx's
 Theory of Revolution represents an exhaustive and definitive treatment of Marx's political theory policy and practice Marx
 and Engels paid continuing attention to a host of problems of revolution in addition to constructing their grand theory All
 these political and social analyses are brought together in these volumes as the author draws not only on the original
 writings of Marx and Engels but also on the sources that they used in formulating their ideas and the many commentaries on
 their published work Draper's series is a massive and immensely valuable scholarly undertaking The bibliography alone will
 stand as a rich resource for years to come Yet despite the scholarly treatment the writing is direct forceful and unpedantic
