**Balancing Power without Weapons** Ashley Thomas Lenihan, 2018-03-22 Why do states block some foreign direct investment on national security grounds even when it originates from within their own security community Government intervention into foreign takeovers of domestic companies is on the rise and many observers find it surprising that states engage in such behaviour not only against their strategic and military competitors but also against their closest allies Ashley Lenihan argues that such puzzling behaviour can be explained by recognizing that states use intervention into cross border mergers and acquisitions as a tool of statecraft to internally balance the economic and military power of other states through non military means This book tests this theory using quantitative and qualitative analysis of transactions in the United States Russia China and fifteen European Union states It deepens our understanding of why states intervene in foreign takeovers the relationship between interdependence and conflict the limits of globalization and how states are balancing power in new ways This title is also available as Open Access

**Balancing State Intervention** Roger W. Benjamin, Carl Richard Neu, 1995 Despite the high degree of convergence and integration between Europe and the United States in the past the threats created by recent pressures and circumstances require a reexamination of the relations between state and market in those nations The evolution of the international system the gradual erosion of state control over industrial change public action and political authority and changes in American and European economic political technological social and demographic conditions have created a wide array of problems that render the current environment quite unrecognizable from that of the Cold War world In *Balancing State Intervention* distinguished European and American scholars and public officials discuss the social and cultural circumstances that create different roles for market forces in Europe and America The authors make projections about how the role of the state in the market will be reshaped on both sides of the Atlantic in order to help policymakers anticipate and avoid points of friction

**Balancing State Sovereignty with Refugees Rights under International Law** Martin Nimbom, 2024-04-03 Essay from the year 2024 in the subject Law Public Law Constitutional Law Basic Rights language English abstract The global refugee crisis has presented a formidable challenge to the traditional understanding of state sovereignty and the control of national borders While sovereignty affords States the right to control their borders and protect their nationals States also have a humanitarian obligation to respect the human rights and dignity of refugees who are often people fleeing from persecution violence and abject poverty This research explores the complex interplay between state sovereignty and humanitarian obligations in the context of refugee protection by exploring the legal ethical and political dimensions of the issue It argues that sovereignty should not be seen as an absolute or fixed concept but rather as a dynamic and relational one that is shaped by the changing realities and norms of the international community By balancing sovereignty with the humanitarian obligation to protect refugees this research also proposes a balanced approach that

respects the rights of sovereign states while addressing the urgent needs of refugees The research concludes that the legal framework which governs refugees continues to be characterized on the one hand by the principles of state sovereignty and related territorial supremacy self defense and self preservation and on the other hand by competing humanitarian principles derived from general international law including the purposes and principles of the United Nations and treaty law **EU Law on State Aid to Airlines** Magnus Schmauch,2012 State intervention in air transport is omnipresent Airlines in particular are major beneficiaries of State aid This book provides a comprehensive analysis of the law regulating State aids to airlines which includes sections on Articles 107 TFEU and 108 TFEU as well as an overview of legal issues raised by air transport and competition in the EU in particular deregulation and its consequences EU Law on State Aid to Airlines follows a multi disciplinary approach by relying on the fundamental concepts of economics and policy analysis This approach allows grasping the wider implications of this sector s issues for the field of State Aid in particular in the light of the more economic approach and the balancing test Furthermore additional perspective is given on State aid law in the air transport sector through comparative analyses of regulations in the United States and Switzerland and outlooks on international relations Finally the book presents a number of recent Commission decisions with a dramatic importance for the air transport with the opening of formal investigation procedures regarding alleged State aid to low cost airlines operating from regional airports all over Europe Magnus Schmauch is Legal Secretary at the EFTA Court in the Chambers of judge Pall Hreinsson Previous experience includes four years as a lawyer at the Court of Justice of the European Union He has published a large number of articles on State aid and other fields of EU law and teaches on EU law and fundamental rights at the University of Lund Sweden Psychological Evaluations for the Courts, Fourth Edition Gary B.
