## **Bangkok Place Practice And Representation:**

*Bangkok* Marc Askew, 2004-08-02 Bangkok is one of Asia's most interesting varied controversial and challenging cities. It is a city of contradictions both in its present and past. This unique book examines the development of the city from its earliest days as the seat of the Thai monarchy to its current position as an infamous contemporary metropolis. Adopting insights from anthropology, urban studies, and human geography, this is a powerful account of the city and its dynamic spaces. Marc Askew examines the city's variety from the inner city slums to the rural urban fringe and gives us a keen insight into the daily life of the city's inhabitants, be they middle class suburbanites or sex workers.

**Changing Representations of Nature and the City** Gabriel N. Gee, Alison Vogelaar, 2018-07-04 The turn of the 1960s-70s, characterized by the rapid acceleration of globalization, prompted a radical transformation in the perception of urban and natural environments. The urban revolution and related prospect of the total urbanisation of the planet, in concert with rapid population growth and resource exploitation, instigated a surge in environmental awareness and activism. One implication of this moment is a growing recognition of the integration and interconnection of natural and urban entities. The present collection is an interdisciplinary inquiry into the changing modes of representation of nature in the city, beginning from the turn of the 1960s-70s. Bringing together a number of different disciplinary approaches, including architectural studies and aesthetics, heritage studies and economics, environmental science and communication, the collection reflects upon the changing perception of socio-natures in the context of increasing urban expansion and global interconnectedness as they were manifest in specific representations. Using case studies from around the globe, the collection offers a historical and theoretical understanding of a paradigmatic shift whose material and symbolic legacies are still accompanying us in the early 21st century.

**Citizen Designs** Eli Elinoff, 2021-03-31 What does it mean to design democratic cities and democratic citizens in a time of mass urbanization and volatile political transformation? *Citizen Designs: City Making and Democracy in Northeastern Thailand* addresses this question by exploring the ways that democratic urban planning projects intersect with emerging political aspirations among squatters living in the northeastern Thai city of Khon Kaen. Based on ethnographic and historical research conducted since 2007, *Citizen Designs* describes how residents of Khon Kaen's railway squatter communities used Thailand's experiment in participatory urban planning as a means of reimagining their citizenship, remaking their communities, and acting upon their aspirations for political equality and the good life. It also shows how the Thai state used participatory planning and design to manage both situated political claims and emerging politics. Through ethnographic analysis of contentious collaborations between residents, urban activists, state planners, participatory architects, and city officials, Eli Elinoff's analysis reveals how the Khon Kaen's railway settlements became sites of contestation over political inclusion and the meaning and value of democracy as a political form in the first decades of the twenty-first century. Elinoff examines how residents embraced politics as a means of enacting their equality. This embrace inspired new debates about the meaning of good citizenship and

how democracy might look and feel The disagreements over citizenship like those Elinoff describes in Khon Kaen reflect the kinds of aspirations for political equality that have been fundamental to Thailand's political transformation over the last two decades which has seen new political actors asserting themselves at the ballot box and in the streets alongside the retrenchment of military authoritarianism Citizen Designs offers new conceptual and empirical insights into the lived effects of Thailand's political volatility and into the current moment of democratic ambivalence mass urbanization and authoritarian resurgence

**Bangkok** Maryvelma Smith O'Neil, 2008 Bangkok stands out as a place of extraordinary allure Beginning as a floating city in a lush tropical setting known to foreigners as the Venice of the East centuries later its majestic Grand Palace and glittering Buddhist temples would compete for the horizon with Western chimneystacks Chinese immigration and investment and Indian commerce have also visibly marked the cityscape where great ethnic diversity is represented in the world famous Thai cuisine Fascinating pockets of traditional indigenous life percolate under a surface of modernity while fragments of intense beauty and sensation abound in the labyrinthine lanes and alleys that replaced canals Bangkok bears the longest city name in the world forty three syllables Locals have shortened it to Krung Thep which means City of Angels Maryvelma O Neil explores their city rich in art history royal ceremony and tradition
