Childlessness in Bangladesh Papreen Nahar,2021-09-21 This book examines the intersectionality and stratified lived experience of rural poor and urban middle class childless women in Bangladesh Childless women in Bangladesh an over populated country where fertility control is the primary focus of health policy are all but non existent Papreen Nahar offers an alarming account of stigma abuse ostracism and violence against these women sharing their experiences of marginalisation in a culture that idealises motherhood In such a reality the experience of childlessness particularly for women can be much more severe than what is defined as infertility in the biomedical sense As childlessness is a complex interaction between biology society and culture the book illustrates the ways in which infertility transforms a health problem into social suffering Although Bangladeshi childless women are systematically excluded by various structural forces it appears they do not succumb to their circumstances rather they develop resilience and agency to become survivors of their new albeit bleak lives The volume will be of interest to scholars working in anthropology reproductive and women s health global health gender studies development studies and Asian studies
