Banking On The Poor:

Banker to the Poor Muhammad Yunus, 2003-07-11 Muhammad Yunus set up the Grameen Bank in his home country of Bangladesh with a loan of just 17 to lend tiny amounts of money to the poorest of the poor those to whom no ordinary bank would lend Most of his customers as they still are were illiterate women wanting to set up the smallest imaginable village enterprises It was his conviction that this new system of micro credit lending even such small sums would give such people the spark of initiative needed to pull themselves out of poverty Today Yunus s system of micro credit is practised around the world in some 60 countries including the US Canada and France His Grameen Bank is now a billion pound business It is acknowledged by world leaders and by the World Bank to be a fundamental weapon in the fight against poverty Banker to the Poor is Yunus s enthralling story of how he did it how the terrible famine in Bangladesh in 1974 focused his ideas on the need to enable its victims to grow more food how he overcame the sceptics in many governments and among traditional economic thinking and how he saw his micro credit extended even outside the Third World into credit unions in the West Such is the importance of his book that HRH the Prince of Wales has contributed a Foreword in which he hails a remarkable man who spoke the greatest good sense Banking on the Poor Robert L. Ayres, 1984-01 Banking on the Poor traces the evolution of Robert McNamara s poverty oriented redirections at the World Bank from 1968 to 1981 Banker To The Poor Muhammad Yunus, Alan Jolis, 2003-10-16 The inspirational story of how Nobel Prize winner Muhammad Yunus invented microcredit founded the Grameen Bank and transformed the fortunes of millions of poor people around the world Muhammad Yunus was a professor of economics in Bangladesh who realized that the most impoverished members of his community were systematically neglected by the banking system no one would loan them any money Yunus conceived of a new form of banking microcredit that would offer very small loans to the poorest people without collateral and teach them how to manage and use their loans to create successful small businesses He founded Grameen Bank based on the belief that credit is a basic human right not the privilege of a fortunate few and it now provides 24 billion of micro loans to more than nine million families Ninety seven percent of its clients are women and repayment rates are over 90 percent Outside of Bangladesh micro lending programs inspired by Grameen have blossomed and serve hundreds of millions of people around the world The definitive history of micro credit direct from the man that conceived of it Banker to the Poor is the moving story of someone who dreamed of changing the world and did **Banker To The Poor** Muhammad Yunus, 2003 The founder of the Grameen Bank relates how he developed the system of micro credit to help eradicate poverty in countries such as Bangladesh by providing financial education and small loans to rural families Banking the Poor , 2009-01-01 Banking the Poor explores level and determinants of financial access in 54 countries mostly in Africa It collects information from two sources central banks and leading commercial banks in each surveyed country It explores associations between countries banking policies and practices and their levels of financial access measured in terms of the numbers of bank account per thousand adults It

builds on the previous work measuring financial access through information from regulators from banks and also from users perspectives in household surveys **Poor's**, 1925 *Credit Markets for the Poor* Patrick Bolton, Howard Rosenthal, 2005-06-30 Access to credit is an important means of providing people with the opportunity to make a better life for themselves Loans are essential for most people who want to purchase a home start a business pay for college or weather a spell of unemployment Yet many people in poor and minority communities regardless of their creditworthiness find credit hard to come by making the climb out of poverty extremely difficult How dire are the lending markets in these communities and what can be done to improve access to credit for disadvantaged groups In *Credit Markets for the Poor* editors Patrick Bolton and Howard Rosenthal and an expert team of economists political scientists and legal and business scholars tackle these questions with shrewd analysis and a wealth of empirical data *Credit Markets for the Poor* opens by examining what credit options are available to poor households Economist John Caskey profiles how weak credit options force many working families into a disastrous cycle of short term high interest loans in order to sustain themselves between paychecks L ic Sadoulet explores the reasons that community lending organizations which have been so successful in developing countries have failed in more advanced economies He argues the obstacles that have inhibited community lending groups in industrialized countries such as a lack of institutional credibility and the high cost of establishing lending networks can be overcome if banks facilitate the community lending process and establish a system of repayment insurance *Credit Markets for the Poor* also examines how legal institutions affect the ability of the poor to borrow Daniela Fabbri and Mario Padula argue that well meaning provisions making it more difficult for lenders to collect on defaulted loans are actually doing a disservice to the poor in credit markets They find that in areas with lax legal enforcement of debt agreements credit markets for the poor are underdeveloped because lenders are unwilling to take risks on issuing credit or will do so only at exorbitant interest rates Timothy Bates looks at programs that facilitate small business development and finds that they have done little to reduce poverty He argues that subsidized business creation programs may lure inexperienced households into entrepreneurship in areas where little profitable investment is possible hence setting them up for failure With clarity and insightful analysis *Credit Markets for the Poor* demonstrates how weak credit markets are impeding the social and economic mobility of the needy By detailing the many disadvantages that impoverished people face when seeking to borrow this important new volume highlights a significant national problem and offers solutions for the future **Banking on the Poor? Branch Placement and Nonfarm Rural Development in Bangladesh** Martin Ravallion, 1999 December 1997 In Bangladesh Grameen Bank puts banks in areas where gains from switching from farming to nonfarm enterprises favor the poor Other banks put more weight on potential gains to the nonpoor Ravallion and Wodon assess whether the placement of bank branches in Bangladesh responds to unexploited potential for nonfarm rural development They compare the branch location choices of a large new private nonprofit bank the famous Grameen Bank with those of more traditional government

banks They allow for heterogeneity in household characteristics conducive to success in nonfarm activities when measuring the potential gains from switching out of farming Farmers are both poor and poorly equipped for success at nonfarm enterprises Even so seemingly feasible but unrealized gains from switching are evident Grameen Bank is attracted to areas where those gains favor the poor Other banks put more weight on potential gains to the nonpoor This paper a product of the Development Research Group is part of a larger effort in the group to assess how well both governmental and nongovernmental financial institutions respond to the needs of the poor The study was funded by the Bank's Research Support Budget under the research project Policies for Poor Areas RPO 681 39 The authors may be contacted at mrvallion@worldbank.org or qwodon@worldbank.org
