# Baltic And North Seas

**Michael Hoelscher**

## **Baltic And North Seas:**

*The Baltic and the North Seas* Merja-Liisa Hinkkanen, David Kirby, 2013-06-17 Exploring the themes of the human relationship with the marine environment and the ways in which the peoples of Northern Europe have experienced and exploited their seas this book reveals how human perception of the northern seas has changed over time Drawing on a wide variety of sources from Denmark and Britain to Norway Finland and Germany *The Baltic and the North Seas* is an insightful and colourful history of the politics economy and culture of this intriguing region

**The North Sea and the Baltic Sea** Nina Morgan, 1997 Describes the formation underwater landscape plant and animal life natural resources and pollution of the North and Baltic Seas

**The Global Coastal Ocean - Regional Studies and Syntheses** Kenneth H. Brink, Allan R. Robinson, 2005

*The Maritime Political Boundaries of the World* Victor Prescott, Clive Schofield, 2005-01-01 This book addresses the often vexed question of national maritime claims and the delimitation of international maritime boundaries The number of undelimited international maritime boundaries is much larger than the number of agreed lines The two boundaries that define the marine domain of coastal states are examined First the baselines along the coast may consist of low water lines or straight lines or a combination of both When straight lines are used they define the seaward limit of the state s internal waters Second the outer limits of claims to territorial seas contiguous zones and exclusive economic zones are measured from the baselines All states will have to delimit at least one international boundary with a neighbouring state whether adjacent or opposite In confined seas no state can claim the full entitlement and must negotiate international boundaries with all neighbours Many states bordering oceans can claim the full entitlement seawards although they will need to delimit national boundaries with adjacent neighbours

Whaling and International Law Malgosia Fitzmaurice, 2015-12-03 Whales are regarded as a totemic symbol by some nations and as a natural marine resource by others This book presents a complex picture of legal problems surrounding the interpretation of the International Convention for the Regulation of Whaling and the role of its regulatory body the International Whaling Commission Contemporary whaling is about the competing interests of whaling nations which are in the minority non whaling nations which are in the majority and indigenous peoples Whales are covered by many international conventions which has led to a very fragmented legal situation and does not necessarily ensure that whales are protected This is one of the paradoxes of the contemporary international legal regime which are explored in this book The book also examines the contentious issue of the right of indigenous peoples to whaling and questions whether indigenous whaling is very different from commercial practices
