Wong,2003 Table of contents      Banking Sector Liberalization in India Christian Roland,2007-10-25 Banking Sector Liberalization in India explores in detail the changes in the Indian banking sector over the last 20 years and puts them into a comparative perspective with the Chinese banking sector For this purpose the author develops a detailed indicator based framework for assessing the liberalization of a banking sector along various process steps based on financial liberalization and transformation studies This framework along with the indicators for the process and the results of liberalization is applied to the banking sectors in India and China to test for the effects of liberalization on the sector and the macro level The key finding is that while liberalization has improved the sectoral performance it has so far had no effect on the macro level The book features a detailed description of recent reforms in the Indian banking sector a set of indicators for evaluating banking sector reforms and a large number of graphs with key figures for the banking sectors in India and China

**Financial Sector Development in the Pacific Rim** Takatoshi Ito,Andrew K. Rose,2009-05-15 The reform in Asian financial sectors especially in banking and stock markets has been remarkable since the currency crisis of 1997 98 East Asia is now a major player in international finance providing serious competition to the more traditional financial centers of London and New York Financial Sector Development in the Pacific Rim provides a rich collection of theoretical and empirical analyses of the growing capital markets in the region Bringing together authors from various East Asian and Pacific nations this volume examines the institutional factors influencing financial innovation the consequences of financial development widespread consolidation occurring through mergers and acquisitions and the implementation of policy reform Financial Sector Development in the Pacific Rim offers the comparative analysis necessary to answer broad questions about economic development and the future of Asia      *A Critical Assessment of Basel II, Internal Rating Based Approach* Vahit Ferhan

Benli,2010      **Banks and Financial Intermediation in Emerging Asia** M. S. Mohanty,Philip Turner,2010 The conventional view is that microeconomic reforms after the 1997 98 Asian financial crisis have greatly strengthened banking systems in Asia Banks have become better capitalised external exposures have been reduced and credit risk has been managed more effectively But this conventional view does not take enough account of the macroeconomic background A sharp rise in domestic savings combined with the recent large scale sterilised intervention and easy monetary policy has led to very easy financing conditions for banks Bank credit expanded Banks have accumulated a large stock of government bonds How these conditions will change and how this will affect banks in Asia is uncertain Supervisory authorities therefore need to be sure that the present very liquid position of most banking systems in Asia does not allow significant but so far only latent increases in market and credit risk to go undetected      Journal of Business Administration ,2006      *Asia, Inc* ,2003

**RIM** ,2006      *Wealth Management* ,      *China Through the Third Eye* Garth Le Pere,2004 China has turned into the most compelling developmental phenomenon in recent history It is also playing an increasingly important role in the political and economic life of South Africa in particular and Africa in general Growing numbers of South Africans are making their

way to the Middle Kingdom many of them at the invitation of the Chinese government to gain first hand experience of this fascinating country and are returning with impressions that are not always captured or shared This book is the first attempt to collate some of these views and insights The contributions are eloquent testimony to the growing interest by South Africans of different callings in making sense of the Chinese genius It is hoped that they will prove useful not only to students of China but will also provide an introductory panorama of Chinese life and society for the South African public This is a timely volume It represents the many strides that have been taken by both countries in developing their bilateral relations since the formal establishment of diplomatic relations in January 1998 equally importantly it is a symbol of the increasing people centred contact that has since taken place
