

and decrease the effective prices offered consumers, with the result that production could be increased with the same number of resources. At the same time, the size of the General Loan Office, which issued about three loans a week when in full operation, enabled it to operate on a much more efficient level than individuals making private loans. The Loan Office made a profit for the government and reduced the costs of acquiring capital in the developing economy of Pennsylvania. Finally, the inspection of export flour and shipbread greatly reduced information costs associated with the West Indies trade. Prices of Pennsylvania flour rose relatively to other North American exporters, and the stage was set for the establishment of grades later in the century—in particular the product "Pennsylvania Super Fine" for which Pennsylvania would be known across the Atlantic.

At least as important as explicit policy was the role of the community operating in the name of custom. Land policy, enforced through the courts, developed a concept of property rights which clearly defined ownership of improvements separately from ownership of land, a most useful concept at a time when the most important form of capital formation was the transformation of virgin woodland into productive farms.

The Seven Years' War brought an end to political and economic unity within Pennsylvania. Immigrants who had settled in the back counties began to complain about underrepresentation; artisans in the cities would soon begin to demand the rights that went along with a metropolis. Interests in the countryside competed with interests in the city, interests in the east with interests in the west, and participants in international trade with those beginning to depend entirely on internal trade. Ultimately, too, interests in Pennsylvania clashed with those of the British Empire. If Pennsylvania was to prove profitable as a colony, Britain would have to find ways to skim off provincial income from a vigorous economy which increasingly was the mother country's competitor. Pennsylvania could offer no product to enhance the metropolis except tax money, and Pennsylvania would not happily offer that. The stage was set for Pennsylvania's participation in the Revolution. Even after the Revolution, however, the legacy of Pennsylvania's early period of independent policy formation remained in American attitudes toward economic growth and the role of government.

## *Banking in the American South, 1836–1865*

Banking in the period 1836 to 1865 was the focus of great national attention by both the Jacksonian Democrats and the Whigs, often generating the most heated controversy of any of the major issues of the day.<sup>1</sup> Banking regulatory policy, as viewed by the Jacksonians, reflected certain fundamental assumptions about equality, which in turn shaped the view of the proper role of government, state and national, in the economy. The American South from 1836 to 1865 presents an opportunity to study the views of government's role and to contrast the policy results of Southern states that basically accepted Jacksonian regulatory assumptions with those that did not. Because some Southern states implemented Jacksonian ideals by investing heavily in their banks, and because other states rejected the ideals, remaining instead relatively uninvolved in banking activity, a general pattern emerged. Five Southern states with a long history of commerce and business developed banking systems that were competitive yet stable
