Lightness in World Literature B. Scott, 2013-11-07 Despite the apparent ubiquity of light literature and despite the greater cultural prestige it has been afforded in recent decades very little has been written on the adjective that actually defines this category What precisely does it signify and what are some of the key strategies by which the effect of lightness is achieved within literary discourse In this original and engaging study Bede Scott explores the aesthetic quality of lightness as demonstrated by a diverse range of narratives spanning four different centuries and five different countries In each case he focuses on a specific type of lightness whether it be the refined triviality of Sei Shonagon's *Pillow Book* the ludic tendencies of Joaquim Maria Machado de Assis' *Posthumous Memoirs of Br's Cubas* or the exhilarating and primitive vitality of Voltaire's *Candide* By bringing together such disparate sources Scott makes a strong case for the universality of this particular aesthetic value while also subjecting its underlying structural features to close critical scrutiny
