## **Coercive Military Strategy:**

*Coercive Military Strategy* Stephen J. Cimbala, 1998 Coercion is persuasion supported by the threat or use of force Just as warfare is often diplomacy carried out by other means coercion the threat of combat or the threat of an escalation in the intensity of combat is a more subtle method of dispute that shades the spectrum between diplomacy and warfare Understanding of coercive military strategy is a prerequisite to the successful making of either policy or war In *Coercive Military Strategy* Stephen J Cimbala shows that coercive military strategy is a necessary part of any diplomatic strategic recipe for success Few wars are total wars fought to annihilation and military power is inherently political employed for political purpose in order to advance the public agenda of a state so in any war there comes a time when a diplomatic resolution may be possible To that end coercive strategy should be flexible for there are as many variations to it as there are variations in wars and warfare Cimbala observes several cases of applying coercive strategy in the twentieth century the U S strategy of limited war during the Cold War the Cuban Missile Crisis in which both the United States and the Soviet Union applied coercive strategy Desert Storm in which the Coalition Forces could practice coercion without restraint and the Vietnam War in which U S coercive strategy was ultimately a failure Additionally Cimbala examines coercion and the theory of collective security which implies a willingness on the part of individual states such as the NATO nations to combine against any aspiring aggressor With his examples and the arguments they illustrate Cimbala shows that although coercive strategy is a remedy for neither the ailments of U S national security nor world conflict it will become more important in peace crisis and even war in the next century when winning with the minimum of force or without force will become more important than winning by means of maximum firepower

*Air Power as a Coercive Instrument* Daniel Byman, John G. McGinn, Keith Crane, Seth G. Jones, Rollie Lal, Ian O. Lesser, 1999-08-20 Coercion the use of threatened force to induce an adversary to change its behavior is a critical function of the U S military U S forces have recently fought in the Balkans the Persian Gulf and the Horn of Africa to compel recalcitrant regimes and warlords to stop repression abandon weapons programs permit humanitarian relief and otherwise modify their actions Yet despite its overwhelming military might the United States often fails to coerce successfully This report examines the phenomenon of coercion and how air power can contribute to its success Three factors increase the likelihood of successful coercion 1 the coercer s ability to raise the costs it imposes while denying the adversary the chance to respond escalation dominance 2 an ability to block an adversary s military strategy for victory and 3 an ability to magnify third party threats such as internal instability or the danger posed by another enemy Domestic political concerns such as casualty sensitivity and coalition dynamics often constrain coercive operations and impair the achievement of these conditions Air power can deliver potent and credible threats that foster the above factors while neutralizing adversary countercoercive moves When the favorable factors are absent however air power or any other military instrument will probably fail to coerce Policymakers use of coercive air power under inauspicious conditions diminishes the

chances of using it elsewhere when the prospects of success would be greater

**Bombing to Win** Robert A. Pape, 2014-04-11 From Iraq to Bosnia to North Korea the first question in American foreign policy debates is increasingly Can air power alone do the job Robert A Pape provides a systematic answer Analyzing the results of over thirty air campaigns including a detailed reconstruction of the Gulf War he argues that the key to success is attacking the enemy's military strategy not its economy people or leaders Coercive air power can succeed but not as cheaply as air enthusiasts would like to believe Pape examines the air raids on Germany Japan Korea Vietnam and Iraq as well as those of Israel versus Egypt providing details of bombing and governmental decision making His detailed narratives of the strategic effectiveness of bombing range from the classical cases of World War II to an extraordinary reconstruction of airpower use in the Gulf War based on recently declassified documents In this now classic work of the theory and practice of airpower and its political effects Robert A Pape helps military strategists and policy makers judge the purpose of various air strategies and helps general readers understand the policy debates

**Emerging Technologies and International Stability** Todd S. Sechser, Neil Narang, Caitlin Talmadge, 2021-11-28 Technology has always played a central role in international politics it shapes the ways states fight during wartime and compete during peacetime Today rapid advancements have contributed to a widespread sense that the world is again on the precipice of a new technological era Emerging technologies have inspired much speculative commentary but academic scholarship can improve the discussion with disciplined theory building and rigorous empirics This book aims to contribute to the debate by exploring the role of technology both military and non military in shaping international security Specifically the contributors to this edited volume aim to generate new theoretical insights into the relationship between technology and strategic stability test them with sound empirical methods and derive their implications for the coming technological age This book is very novel in its approach It covers a wide range of technologies both old and new rather than emphasizing a single technology Furthermore this volume looks at how new technologies might affect the broader dynamics of the international system rather than limiting the focus to a stability The contributions to this volume walk readers through the likely effects of emerging technologies at each phase of the conflict process The chapters begin with competition in peacetime move to deterrence and coercion and then explore the dynamics of crises the outbreak of conflict and war escalation in an environment of emerging technologies The chapters in this book except for the Introduction and the Conclusion were originally published in the *Journal of Strategic Studies*

*Airpower Journal*, 1999 *Avoiding War* Yaacov Bar-Siman-Tov, 1991-08-18 Drawing on 11 case studies beginning with the Crimean War and ending with the 1973 Mideast War this volume presents an ambitious analysis of crisis management The contributors analyze the role of factors such as intelligence bargaining rules and stress Throughout the

volume they attempt to grapple with the central problem facing experts on superpower relations today how relevant is this kind of analysis to a post Cold War environment They conclude with possible future flashpoints recommendations for containing escalation and integrate the overall study s findings into existing theories of crisis behavior They also make a convincing case that there are valuable lessons to be learned from past U S Soviet crises An epilogue touches on the outbreak of the Gulf crisis in 1990 ISBN 0 8133 1232 9 59 95      The Use of Force After the Cold War H. W. Brands, Darren Pierson, Reynolds S. Kiefer, 2000 In this volume eleven leading scholars apply their expertise to understanding what if anything has changed and what has not why the patterns are as they are and just what the future might bring Together the authors address political moral and military factors in the decision to use or avoid military force Case studies of the Gulf War and Bosnia analyses of the role of women in the armed forces and the role of intelligence agencies and studies of inter branch and inter agency tensions and cooperation inform the various chapters The volume will help scholars policy makers and concerned citizens contemplate national alternatives when force threatens BOOK JACKET      *Naval War College Review*, 2016      *The Global Strategic Revolution - Third Millennium Strategic Culture Change Management* Gebhard Deissler, 2012-06-04 Scientific Study from the year 2012 in the subject Politics General and Theories of International Politics language English abstract Those who seek military solutions by force in the global arena have not yet arrived in the new millennium They are trying to set precedents in this century for strategic options and solutions by force and military might that pertain to past millennia The crossing of the threshold to the new millennium was a historical occasion for progressing into a new era of global conflict resolution that has been ignored so far Enforcing negotiated solutions sounds like a contradiction in term due to its implication of using force in order to bring about negotiated solutions in the Middle East and elsewhere in the world Yet the use of force should be understood here as the use of a previous strategic concept for conflict resolution intended to bring about future oriented sustainable strategies in the shape of negotiated conflict resolution In other words diplomatic economic and political strategies can be supported by coercive forms of specific military strategy in order to force conflict partners to force themselves to adopt the negotiated conflict resolution strategy at the exclusion of violent military conflict resolution strategies In other words a change of millennia old patterns of conflict resolution strategies must be brought about if necessary by coercive means of all forms shapes and kinds that are below the level of hot armed conflict And there are quasi no limits to human intelligence as far as alternative ways and means of conflict resolution are concerned that differ from the old habits and patterns      Force and Diplomacy in the Future Stephen J. Cimbala, 1992-05-30 This volume focuses on the relationship between force and policy as it might be viewed by the major powers in the future especially in the context of the end of the Cold War and efforts to contain nationalism and irredentism which threaten to spread from the Balkans and the new states in the former Soviet Union Cimbala begins with the the role of NATO in the new age of nuclear escalation and the role of coercive strategy in the Gulf Crisis of 1991 He then discusses

Prussian military theorist Karl von Clausewitz's argument that war and politics are inseparable and his views on the problem of military escalation Cimbala also covers the roles of punishment and denial in contemporary nuclear strategy and concludes with the implications of the study for the role of force and policy in the future ISBN 0 275 94109 4 47 95

**Naval War College Review** Naval War College (U.S.),1999

**Russia and Armed Persuasion** Stephen J. Cimbala,2001 In *Russia and Armed Persuasion* Stephen J Cimbala argues that Russia's war planners and political leaders must make painful adjustments in their thinking about the relationship between military art and policy in the twenty first century Russia must master the use of force for persuasion not just destruction As the author shows military persuasion requires that Russian leaders master the politico military complexity of crisis management deterrence and arms control and the limitation of ends and means in war Russia now has scarce resources to devote to defense and can no longer afford the stick only diplomacy and strategy that have characterized some of its recent past Russian and Soviet military thinking historically emphasized the blunderbuss and total war overwhelming mass firepower and conflicts of annihilation or prolonged attrition However historical experience also forced Russia and the Soviet Union to come to grips with crisis management and with limited aims and means in the conduct of war On the one hand Russia failed the test of military persuasion in its management of the July 1914 crisis that plunged Europe into World War I On the other hand the Soviet Union did adjust to the requirements of the nuclear age for crisis management deterrence and limited war Using this mixed record of Russian and Soviet success and failure in twentieth century experience Cimbala argues that Russia can and must improve in the twenty first century According to the author the first decades of this century will pose at least three immediate challenges to Russia's military persuasion Russia must continue to pursue strategic nuclear arms control and arms reductions with the United States and avoid re starting the Cold War by means of an ill considered race in missile defenses Second Russia must maintain a surer grip on the military information revolution especially as it pertains to the management of Russia's nuclear deterrent Third Russia must develop forces that are more flexible

**The Economics of Conflict: Case studies** Todd Sandler,Keith Hartley,2003

**Conventional Coercion Across the Spectrum of Operations** David E. Johnson,Karl P. Mueller,William H. Taft (V.),2002 The raison d'être for any military is to deter an adversary from acting inimically to a nation's interests or if deterrence fails to coerce him into ceasing the actions After defining terms and reviewing the literature on coercion this report looks at the utility of the military as a coercive instrument The authors analyze cases that provide insights into conventional coercion They conclude by stressing the unchanged nature of coercion and that only a thorough understanding of our adversaries and of our own will and capabilities will yield a successful coercive strategy

*The Politics of Coercion: Toward a Theory of Coercive Airpower for Post-Cold War Conflict* ,2001 The focus of this thesis is the following research question What does coercion theory suggest about the use of airpower in post Cold War conflict This thesis aims to determine if any of the existing theories of coercion namely punishment risk decapitation and denial can stand alone as an adequately coherent substantive and codified

approach Three important attributes of conflict in the post Cold War era 1 limited non protracted war 2 political restraint and 3 the importance of the better state of peace provide a framework for this analysis If these existing constructs fail the test the study will investigate the potential content and applicability of a new theory for post Cold War coercive airpower

Presidential Campaigns Kathleen Hall Jamieson, Matthew Miller, 2000-11 It is a truism that the issues politicians discuss in campaigns deserve study but what about the issues they do not discuss The question of what gets on a presidential campaign s radar screen what does not and why is central to understanding how effectively campaigns function as tools of self government This issue of The Annals examines dimensions of these questions through articles originally commissioned for two conferences at the National Press Club in Washington D C If these articles together amount to a catalogue of complaints about the quality of America s presidential debate perhaps that is to be expected Views on what candidates ought to discuss will always lie in the eye of the beholder What the contributors to this volume share however is the conviction that campaign discourse matters and that defining the campaign agenda is central to democracy So long as candidates seek to win 50 percent of the vote plus one while citizens struggle to find expression of and answers for their concerns the question Whose campaign is it anyway will be with us **The Best Books for Academic Libraries: General works, military & naval, library science** ,2002
